There are not many gaming chairs in turkey for in gaming market and i believe gaming chair like this can be sold easi
lso people who work in companies. Because people are sitting in their chair so long and it has to be comfortable for th
long hours sitting in front of computers.
nain customers will be gamers first but other then that we are thinking we can sell this to people who started to work fr
se of coronavirus.
ve think that we can sell them on low price so that people don't have to buy the expensive stuff that out there online .
ob work is gonna be so simple we don’t need office or something we just need a storage to put all the chair there and
ng cargo companies.
