CSE4198

ACADEMIC POSTER PREPARATION

POSTER SESSION

POSTER PRESENTATION

The aim of the poster presentation:

- To evaluate the projects in broader terms by department members, thereby increasing the likelihood of an objective marking

- To make the students acquire the skills for presentation techniques and speaking to an audience.

CONTENTS OF THE POSTER

- Title of the project
- Logo of the University and the Faculty
- Group member(s) and Advisor(s)
- Problem definition
- Contributions
- Methods
- Experiments and their results
- Conclusion
- References
- (Used Technologies)

POSTER PROPERTIES

- Will the poster be horizontal or vertical?
  - The poster will be **vertical**

- What about poster sizes?
  - The size of the poster will be **A0 (84,1x118,9 cm)**

SOFTWARES FOR POSTER PREPERATION

MS Publisher

- + WYSIWYG
- + Very easy to use
- – Licensed, but often happens in schools
- - It is necessary to put the mathematical formulas as pictures

SOFTWARES FOR POSTER PREPERATION

Scribus

- + Free software
- + Partially WYSIWYG (not happening with mathematical formulas)
- + LaTeX support
- – Not very easy to use

SOFTWARES FOR POSTER PREPERATION

LaTeX Beamer

- + Perfect for mathematical expressions
- + Free software
- - not WYSIWYG
- - Requires experience to use

SOFTWARES FOR POSTER PREPERATION

MS Powerpoint

- + WYSIWYG
- + Easy to use
- – Its main use is not to prepare posters

SOFTWARES FOR POSTER PREPERATION

Adobe Indesign

- + WYSIWYG
- - Requires experience to use
- - Not good for mathematical content
- - Licensed

PAY ATTENTION TO YOUR POSTER

- Use visuals
- Prepare well
- Make the texts legible

FONTS

- Use legible fonts. Do not use the following in the main text!
  - Comic Sans
  - *Monotype Corsiva*
  - Times New Roman
- Pay attention to font sizes
  - Discover the real size of the image on your screen

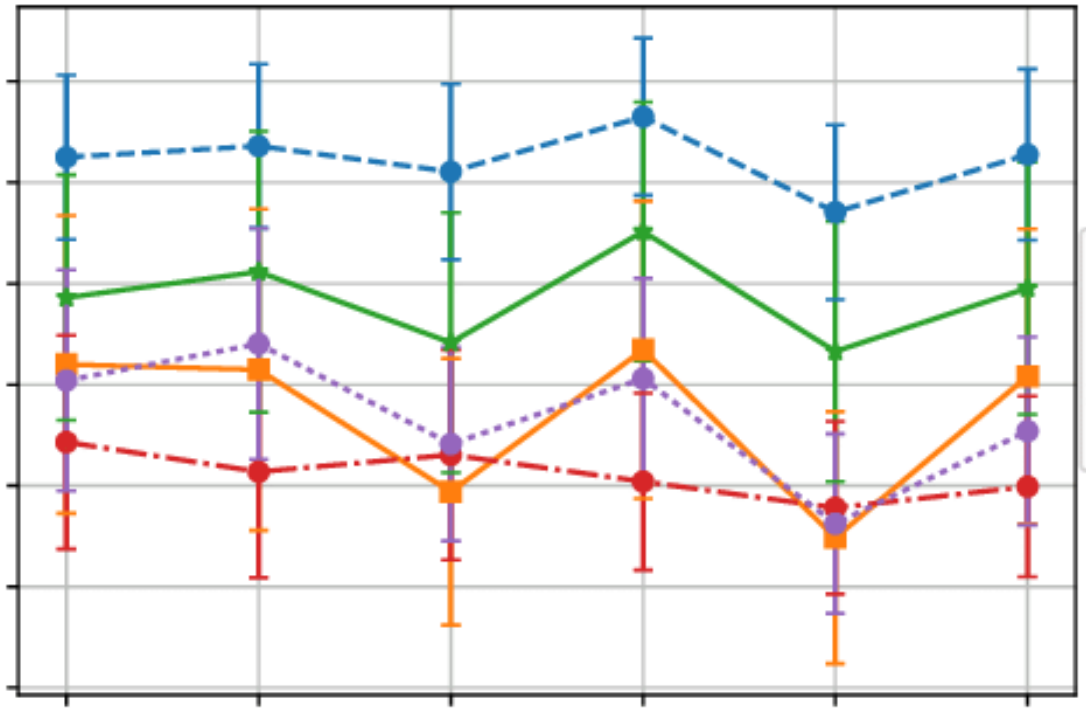

FIGURE DIMENSIONS

- Use vector graphics
  - SVG
  - EPS
  - PDF
- If not, use 300dpi high resolution graphics
- Don't change the aspect ratio
- Keep original figures, may need to be updated later

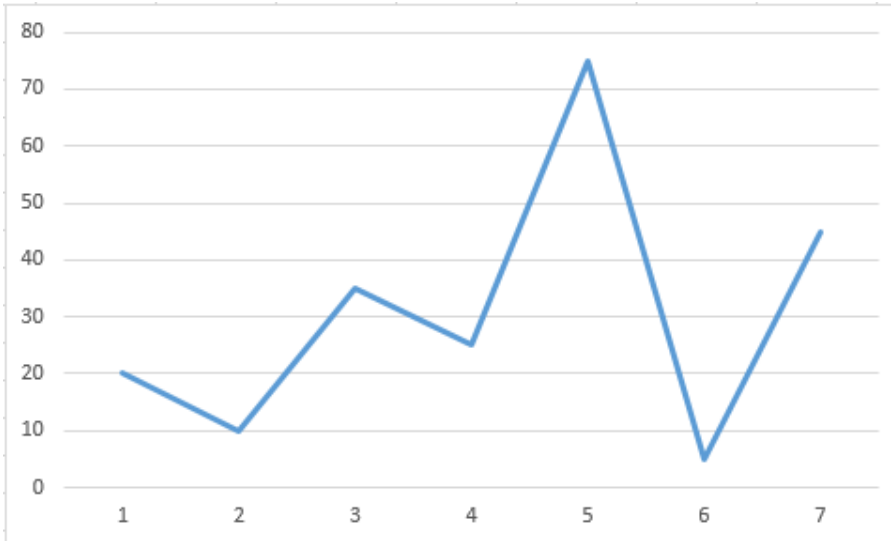

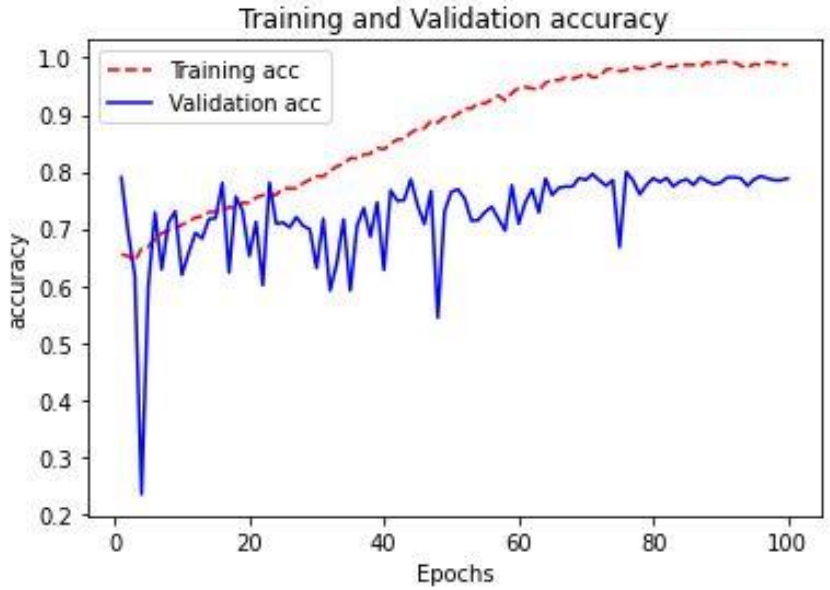

KEEP THE FIGURES SIMPLE

AXIS

- Remember to write down the axis names
- Remember to write down the units
- Let the points on the axis be integers, not too often

PRINTING

- You can print on fabric; you fold it and put it in your bag, it will be easy to carry.
- It may not be a problem with modern digital prints, but still convert the poster to CMYK colors before printing.
- Bring the PDF to the printing house.
- If you use a different font, embed it in the file.

PLAN YOUR SPEECH

- Prepare speeches of different lengths: 1, 2, 5 min.
  - At most 10 minutes for presentation
  - At most 5 minutes for questions
- Tell listeners
  - Describe the problem and talk about its importance (Introduction)
  - Describe your goal and methods, say your contribution (Goal & Methods)
  - Report the findings (Results)
  - Interpret the results and say what they mean (Discussion)

PREPARE FOR YOUR SPEECH

- Be simple and straightforward
- Avoid boring words and phrases while presenting
  - Aaaa, eeee, iii, …
  - You know, well, well, well, actually, actually, really, seriously, …
- Speak either Turkish or English. Don't let your speech be soup.
- Presentation Language will be English.
- In the question and answer section, maybe you can answer in Turkish according to the preference of the teacher who asks the question.

LET YOUR POSTER TELL OR EXPRESS YOURSELF

DO A DEMO IF POSSIBLE

ANOTHER THINGS

- Take A4-copies of your poster with you. Present to those who are interested.
- Dress up in style. It increases your self-confidence.
- Keep your shoes comfortable because you can stand for a long time
- You can check the Open Clipart for different pictures
- Stay by your poster during the poster session
- Your only concern is to introduce your work to incoming people and get feedback

CONTROL LIST

- Is the poster clear and easy to read?
- Does the poster flow sequence be clear?
- Can be read from 2 meters away in a few minutes?
- Does it convey your message without the need for verbal narration?
- Have you reviewed the spelling and punctuation again?
- Have you been able to adequately convey the content of your related work?
- Have you checked the copyrights in the materials you use?
- Do you have a contact address on the poster?
- Have you rehearsed your speech?
