

Hande Sinem Ergun, Prof. Dr.
Faculty of Business
Department of Business Administration (in English)

03.10.2016

Course Outline

- Finding yourself
- Thinking skills
- Emotional intelligence
- Effective discipline
- Goal setting for success
- Personal confidence and motivation
- Connecting with people
- Succesful public speaking
- Successful time management
- Creating your cv as a self marketing tool
- Management basics, strategic management, managing the human resource
- Introduction to business, business planning, business models

What is career?

Def. (Oxford English Dictionary)

A person's course or progress through life.

It also pertains to his occupational or profession that usually involves special training or formal education and is considered to be a person's lifework.

What is career development?

Career development is an ongoing process of gaining knowledge and improving skills that will help an individual to establish a career plan.

Why Career Development?

Today's people;

- *Never plan for the future.*
- *Follow the crowd*
- *Choose by influence of others.*
- *Accept the parent's verdict(decision) by force*
- *Get tempted by current trends*
- *Jump into any career*
- *Lack motivation*
- *Fail to ''discover their lives''*
- *Live in a fantasy world*

Current Trends

- Focus is lost.
- Effort to increase quantity.
- Survival of the fittest.
- Less influence by parents, teachers, etc.
- Increasing Dropouts .
- Checking quality in products such as food and clothing but not education.
- Increasing competition
- Effort to increase quantity.
- A-I-M LESS process

Who are responsible for these?

- Students themselves.
- Parents - most of them.
- Teachers - not every body.
- Schools & Colleges – majority of them.
- Society

1. Government.

- People who have knowledge.
- People who achieved success but forgot others.
- People who can influence others for good.

Why Select a Career?

- We have been created unique. (Eg. Fingerprint).
- We are born only once.
- We spend almost 40 years on our work.
- A total over 80,000 hours , we work.
- Now ask yourself how you will spend these 80,000 hours before you die??????

Table 4: Comparing skills demand, 2018 vs. 2022, top ten

Today, 2018	Trending, 2022	Declining, 2022
Analytical thinking and innovation	Analytical thinking and innovation	Manual dexterity, endurance and precision
Complex problem-solving	Active learning and learning strategies	Memory, verbal, auditory and spatial abilities
Critical thinking and analysis	Creativity, originality and initiative	Management of financial, material resources
Active learning and learning strategies	Technology design and programming	Technology installation and maintenance
Creativity, originality and initiative	Critical thinking and analysis	Reading, writing, math and active listening
Attention to detail, trustworthiness	Complex problem-solving	Management of personnel
Emotional intelligence	Leadership and social influence	Quality control and safety awareness
Reasoning, problem-solving and ideation	Emotional intelligence	Coordination and time management
Leadership and social influence	Reasoning, problem-solving and ideation	Visual, auditory and speech abilities
Coordination and time management	Systems analysis and evaluation	Technology use, monitoring and control

Leadership Development

Sample Agenda—Two-Day Career Planning Workshop

Before the program—Two weeks prior to the workshop participants receive a letter confirming their participation in the program and package of work to be completed before coming to the workshop. The exercises in this package include skills inventory, values identification, life accomplishments inventory, and a reading describing career direction options.

Day 1

8:30–10:00 Introduction and Overview of Career Planning

Welcome and Introduction to Program
- Welcome by general manager
- Overview of agenda and outcomes
- Participant introductions (statements of expectations for the program)

Overview of Career Development
- Company's philosophy
- Why career planning is needed
- What career planning is and is not
- Career planning model

10:00–Noon Self-Assessment: Part 1

Individual Self-Assessment: Values
- Values card sort exercise
- Reconciling with values pre-work
- Introduce career planning summary work sheet

Individual Self-Assessment: Skills
- Motivated skills exercise
- Examining life accomplishments (synthesize with pre-work)
- Identifying accomplishment themes
- Preferred work skills (from pre-work inventory)
- Fill in career planning summary work sheet

1:00–3:00 Self-Assessment: Part 2

Individual Self-Assessment: Career Anchors
- Career anchoring pattern exercise
- Small group discussions
- Fill in career planning summary work sheet

Individual Self-Assessment: Preferences
- What success means to me
- Skills, knowledge, personal qualities
- Fill in career planning summary work sheet

Individual Self-Assessment: Career Path Pattern
- Synthesize with direction options from pre-work
- Fill in career planning summary work sheet

3:30–4:30 Environmental Assessment

Information About the Company
Goals, growth areas, expectations, turnover, competition for jobs, skills for the future
Fill in career planning summary work sheet
Personal career profile
Reality test, how you see self at this point by sharing

Day 2

8:30–10:00 Goal Setting

Warm-Up Exercise
Review of where we've been and where we're going
Setting goals—where do I want to be?
Creating an ideal future
Future skills and accomplishments
Desired lifestyle
Life and career goals

10:15–1:30 Environmental Assessment: Part 2

Career resources in the company
Introduce support services and hand out information
Marketing yourself—what it takes to achieve your goals here
Describe resource people who will be with the group for lunch and brainstorm questions/issues to be discussed
Lunch with resource people
Review lunch discussions

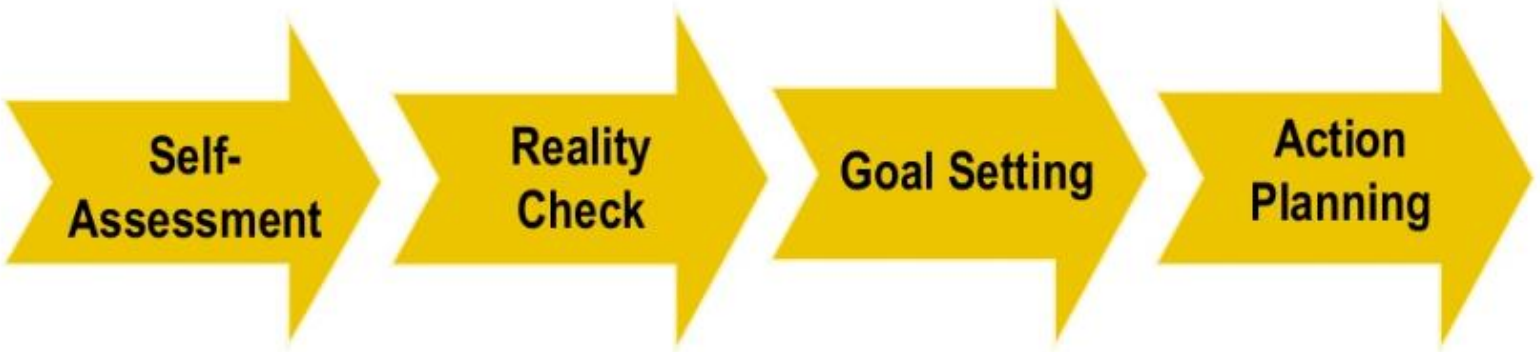

1:30–4:30 Developing Career Action Plans

Making career decisions
Identifying long-range alternatives
Identifying short-range alternatives
Improving career decisions
Decision styles and ways to enhance them
Creating your career plan
Reconciling your goals with options
Next career steps
Development action plan
Contingency planning
Making It Happen—Making Commitments to Next Steps
Summary and Adjourn

Source: Fred L. Otte and Peggy Hutcheson, *Helping Employees Manage Careers* (Upper Saddle River, NJ: Prentice Hall, 1992), pp. 22–23. In addition to career development training and follow-up support, First USA Bank has also outfitted special career development facilities at its work sites that employees can use on company time. These contain materials such as career assessment and planning tools.

The career management process:

Career Development Process

STEP 1

Discovering Yourself

- What are my interests? Values? Skills? Personality preferences? Strengths?
- What are three careers that interest me?
- What are three college majors that I want to explore?

STEP 2

Exploring Options

- What information or individuals can help me to explore my college or career options?
- What classes or activities can help me to develop my strengths?
- How can I learn more about informational interviews, job shadowing, exploratory internships, service learning, civic honors, or student organizations to gain firsthand experience?

STEP 3

Making a Decision

- How much time and energy am I willing to invest to make a career decision?
- Who is part of my support system to help me evaluate the pros and cons?
- What are my top priorities to consider for this decision?

STEP 4

Taking Action

- How can I strengthen my readiness for success in a college major?
- What is one goal that I have? How can I reach it? What action can I take now?
- Which one of my talents can I develop through classes or outside activities?

STEP 5

Evaluating the Decision

- Is my decision a realistic option?
- Is there anything preventing me from achieving this goal? What would it mean if I didn't have any barriers?
- Who in my support system can assist me with achieving this goal?

Career and Health

- **High levels of career** uncertainty and occupational dissatisfaction are positively correlated with high levels of psychological and physical distress (Herr, 1989).
- High levels of unemployment are associated with increased rates of chemical dependency, interpersonal violence, suicide, criminal activity, and admissions to psychiatric facilities (Herr, Cramer, & Niles, 2004).

The Meaning of "WORK"

"Work is undeniably one of the most essential of all human activities. For a start, it is the basis of economic survival of individuals... and society. Beyond this, an individual's job structures much of her or his time and, one hopes, provides a source of personal fulfillment. An occupation also shapes one's identity and, in the eyes of others, largely determines an individual's status or position in society"

Work, Industry, and Canadian Society, *Krahn & Lowe. 1996*

A Model of Career Development

	Exploration	*Establishment*	*Maintenance*	*Disengagement*
Developmental tasks	Identify interests, skills, fit between self and work	Advancement, growth, security, develop life style	Hold on to accomplishments , update skills	Retirement planning, change balance between work and non-work
Activities	Helping Learning Following directions	Making independent contributions	Training Sponsoring Policy making	Phasing out of work
Relationships to other employees	Apprentice	Colleague	Mentor	Sponsor
Typical age	Less than 30	30 – 45	45 – 60	61+
Years on job	Less than 2 years	2 – 10 years	More than 10 years	More than 10 years

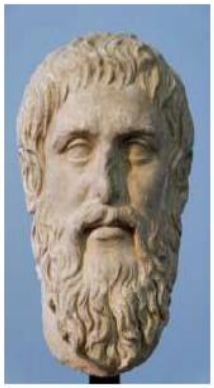

Course Outline

- Finding yourself
- Thinking skills
- Emotional intelligence
- Effective discipline
- Goal setting for success
- Personal confidence and motivation
- Connecting with people
- Succesful public speaking
- Successful time management
- Creating your cv as a self marketing tool
- Management basics, strategic management, managing the human resource
- Introduction to business, business planning, business models

LIFE…

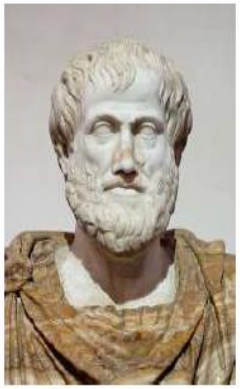

LET US START WITH…

WESTERN PHILOSOPHY

PLATO

"attaining the highest form of knowledge"

ARISTOTLE

"achieving the Highest Good-that is eudaemonia"

ARISTIPPUS

"pleasure is the supreme good"

MARCUS AURELIUS

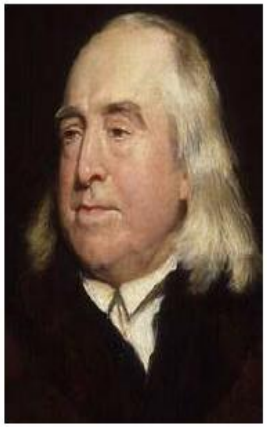

"freedom from *suffering* (stoicism)"

WESTERN PHILOSOPHY

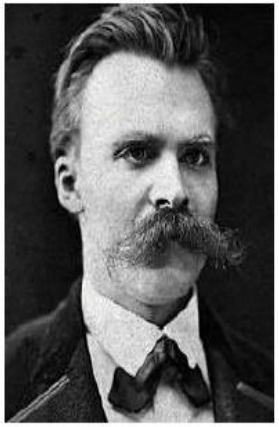

KANT

"single moral obligation: the Categorical Imperative"

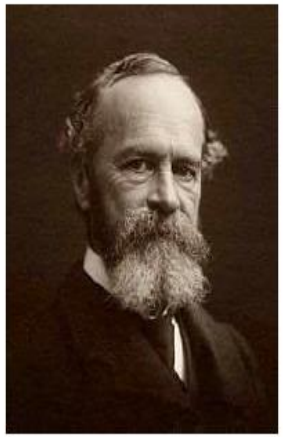

JEREMY BENTHAM

"greatest happiness principle-as much happiness to as many"

FRIEDRICH NIETZSCHE

"life is without objective meaning (nihilism)"

WILLIAM JAMES

"useful understanding of life is more important than searching for an impractical abstract truth about life (pragmatism)"

TOWARDS 20TH CENTURY…

WESTERN PHILOSOPHY

KIERKEGAARD

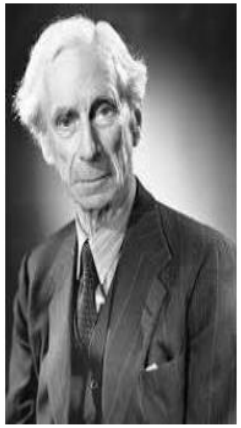

"life is full of absurdity, and one must make own values in an indifferent world (existentialism)"

ALBERT CAMUS

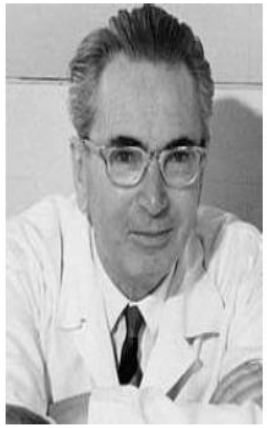

"3 ways (absurdism):

1. *Suicide (escaping existence)*
2. *Religious Beliefs (psychological suicide)*
3. *Acceptance of Absurd"*

BERTRAND RUSSEL

"to say that life, itself, has meaning, is a misuse of language. Meaning in life results from life events"

VIKTOR FRANKL

"what is the meaning of life?— evaporates when one is fully engaged in life. The question then morphs into more specific worries such as "What delusions am I under?"

FROM THE PERSPECTIVE OF

RELIGION AND THEISM

CHRISTIANITY

to seek divine salvation through the grace of God and intercession of Christ

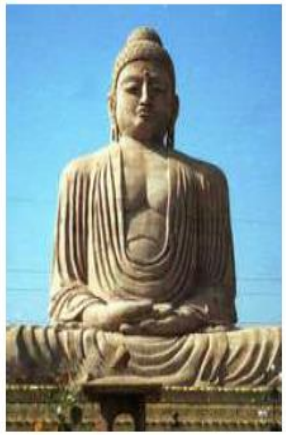

ISLAM

to worship the creator Allah by abiding by the divine guidelines revealed in the Qur'an and the tradition of the prophet

HINDUISM

the meaning of life is tied up in the concepts of karma, samsara, and moksha.

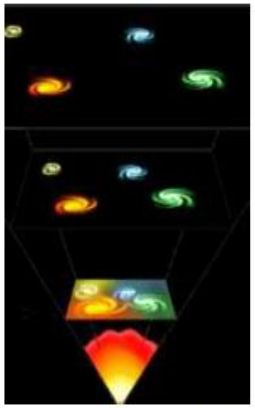

BUDDHISM

Does not speak about meaning of life, but about the potential of human life to become free from both suffering and rebirth through Nirvana

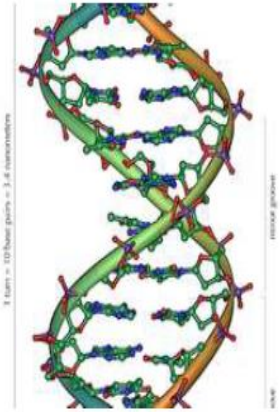

AND NOW…

SCIENTIFIC EXPLANATION

THE UNIVERSE

"Origins and ultimate fate of the universe-Big Bang"

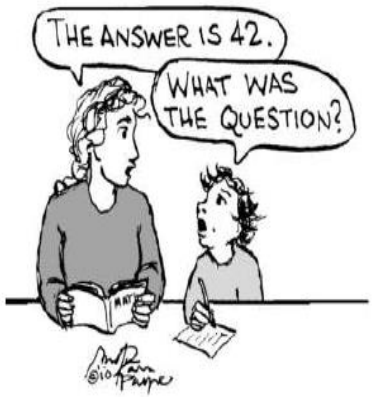

BIOLOGICAL ORIGIN

"if there is a primary function to life, it is the replication of DNA and the survival of one's genes"

TERROR MANAGEMENT THEORY

"human meaning is derived from a fundamental fear of death, and values are selected when they allow us to escape the mental reminder of death"

ANSWER TO EVERYTHING

"after seven and a half million years of calculation by a giant supercomputer called Deep Thought, which explains that "I think the problem, is that you've never actually known what the question is."

SO WHAT'S THE TRUTH?

To survive, that is, to live as long as possible, including pursuit of immortality (through scientific means).
To achieve biological perfection

To seek beauty in all its forms

To have a pure soul and experience God

To live one's dreams.

To love those who mean the most.

To become the best version of yourself.

To replicate, to reproduce. "The 'dream' of every cell is to become two cells."

To seek wisdom and knowledge

To rule the world.

To seek happiness and flourish.

To do good, to do the right thing *(help others, end suffering)*

- SADLY, ANSWER IS 'IT DEPENDS'.

DEPENDS ON YOU

To survive, that is, to live as long as possible, including pursuit of immortality (through scientific means).
To achieve biological perfection

To live one's dreams.

To seek beauty in all its forms

To become the best version of yourself.

To love those who mean the most.

To replicate, to reproduce.
"The 'dream' of every cell is to become two cells."

To seek wisdom and knowledge

To have a pure soul and experience God

To seek happiness and flourish.

To rule the world.

To do good, to do the right thing *(help others, end suffering)*

Who are you?

Human…Life…World…

Material

- 5 senses

  (acting, doing)
  - Having a job
  - Earning money
  - Being famous
  - Being successful
  - Married/having a lover
  - Having kids
  - Having friends
  - Working hard

Spiritual

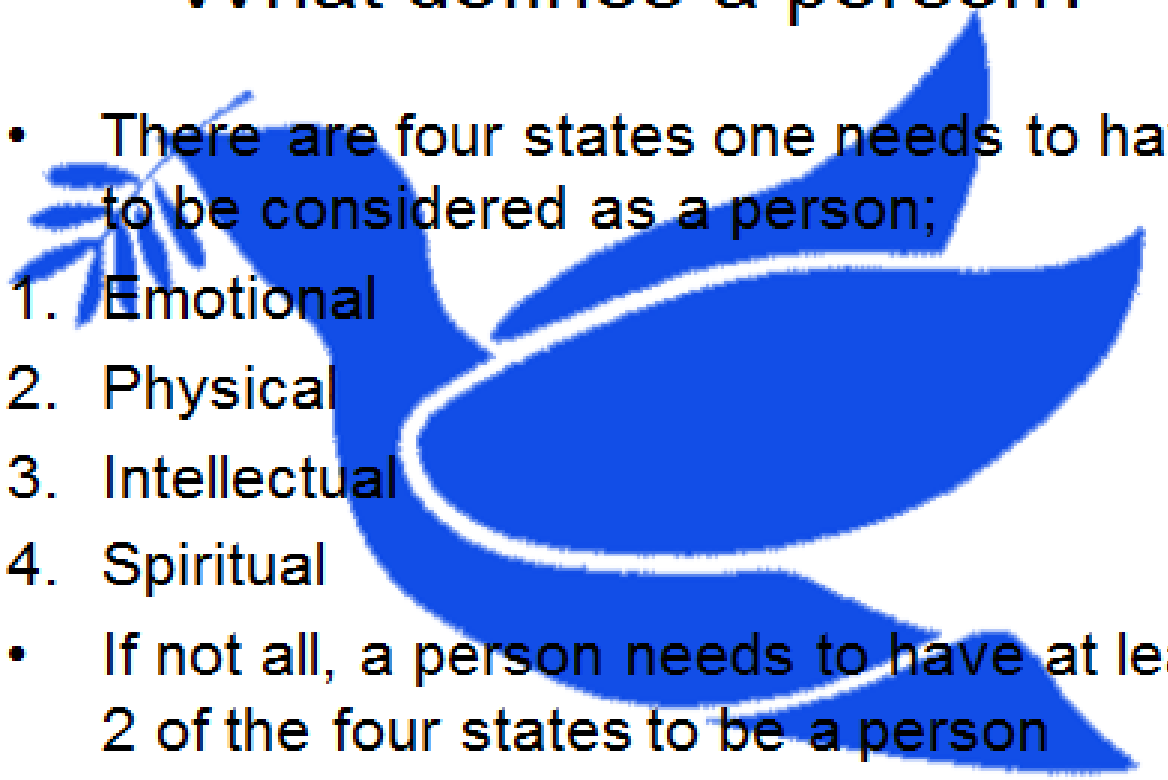

- Beyond 5 sens
  (being, feeling)
  - success
  - time
  - education
  - courage
  - belief
  - Love
  - Fear
  - Jealousy
  - compassion
  - ambition
  - Internal journey….

- Life is all about social creativity

  includes the process of inner journey;

  It is the journey not the destination

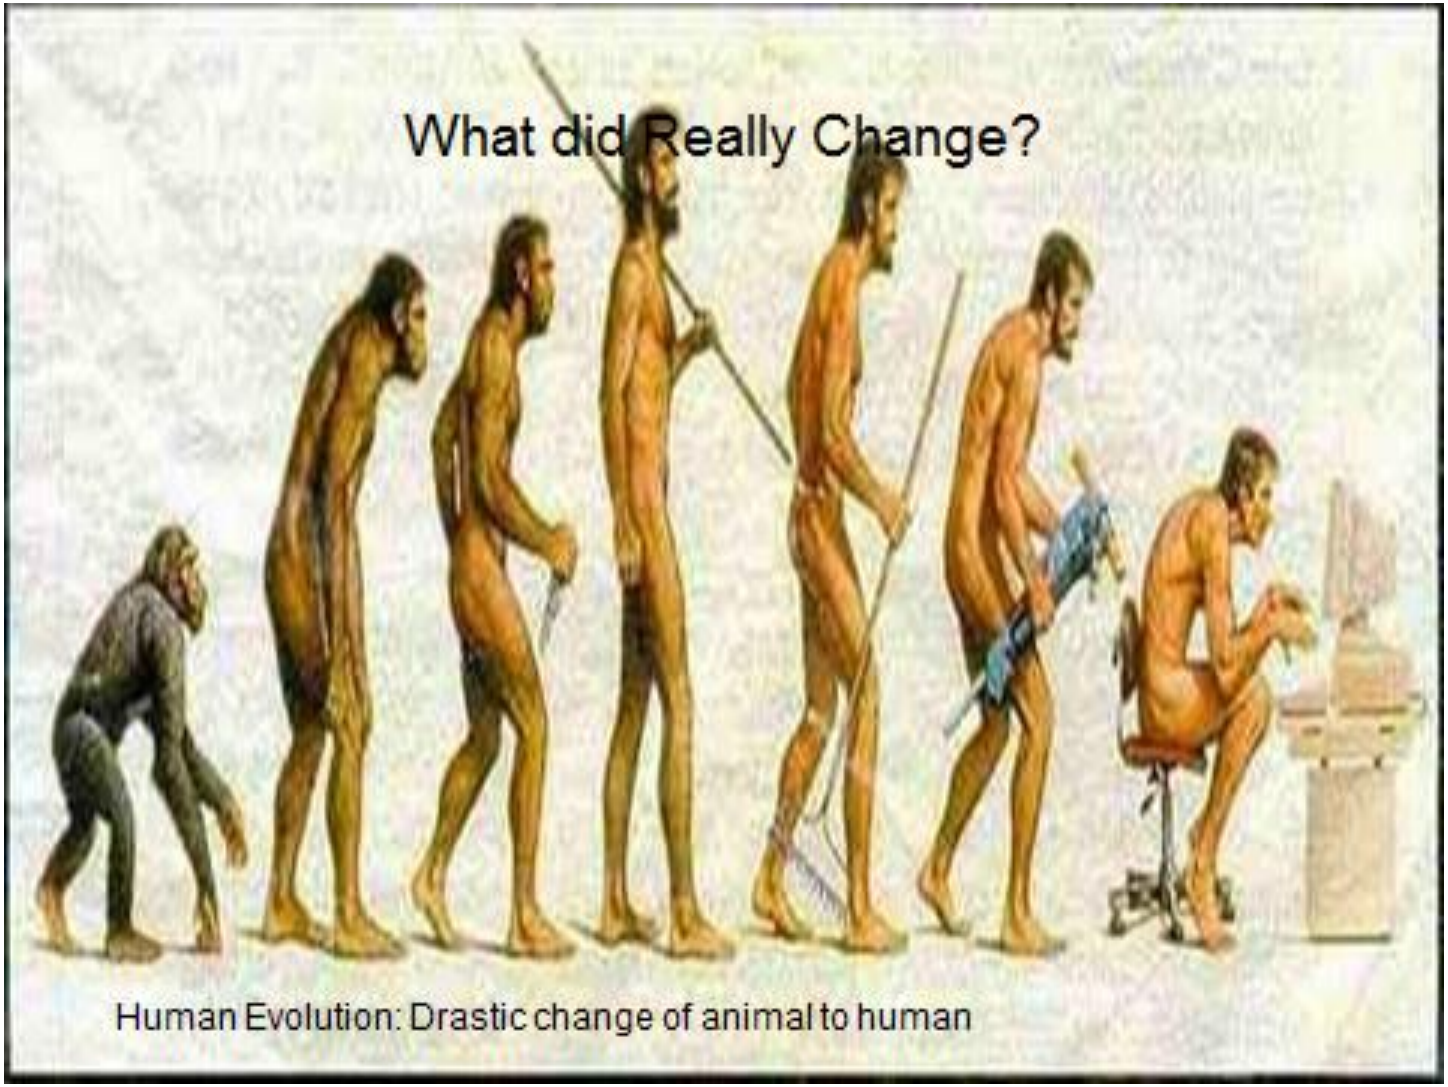

What defines a person?

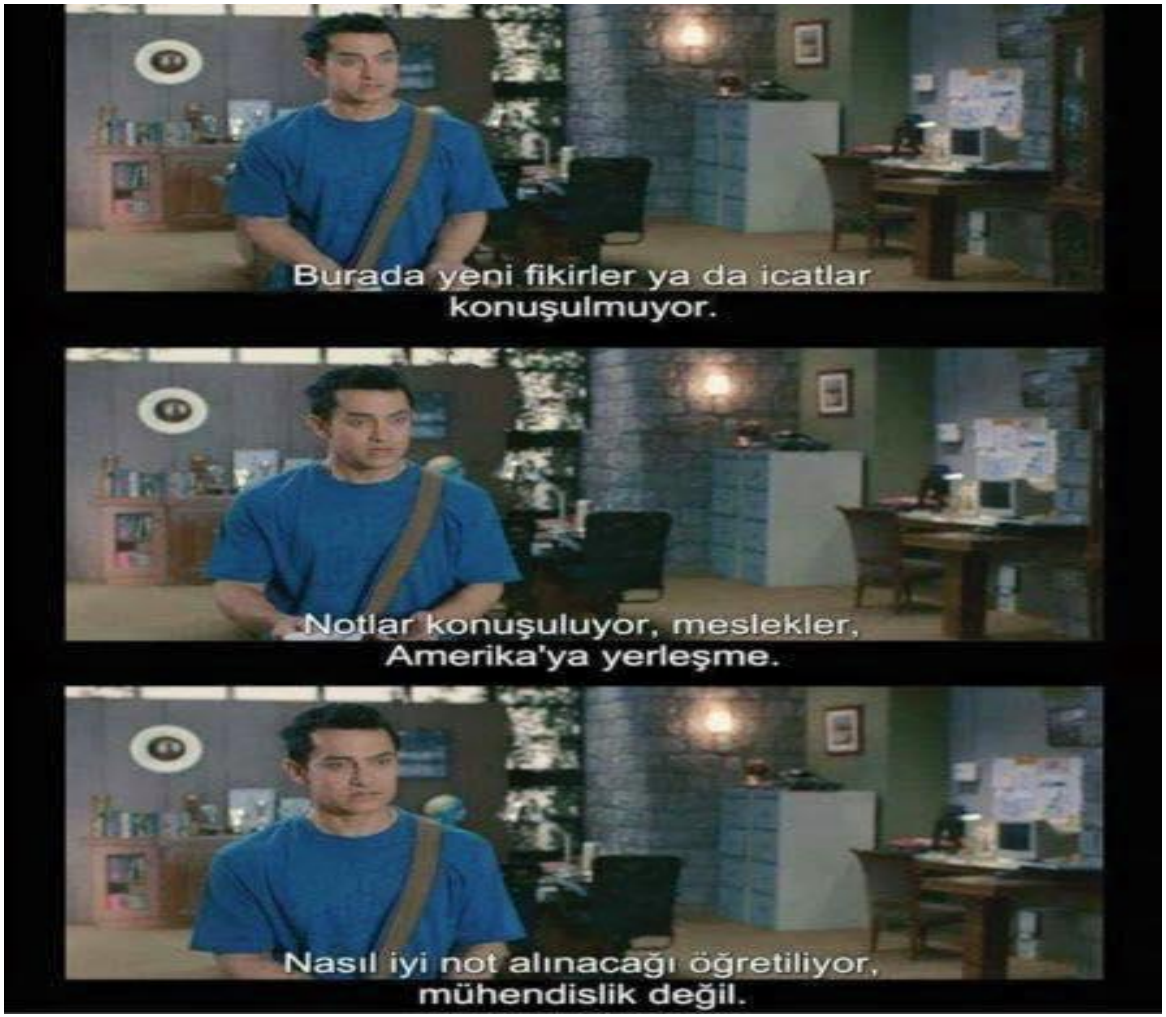

- There are four states one needs to have to be considered as a person;

1. Emotional
2. Physical
3. Intellectual
4. Spiritual

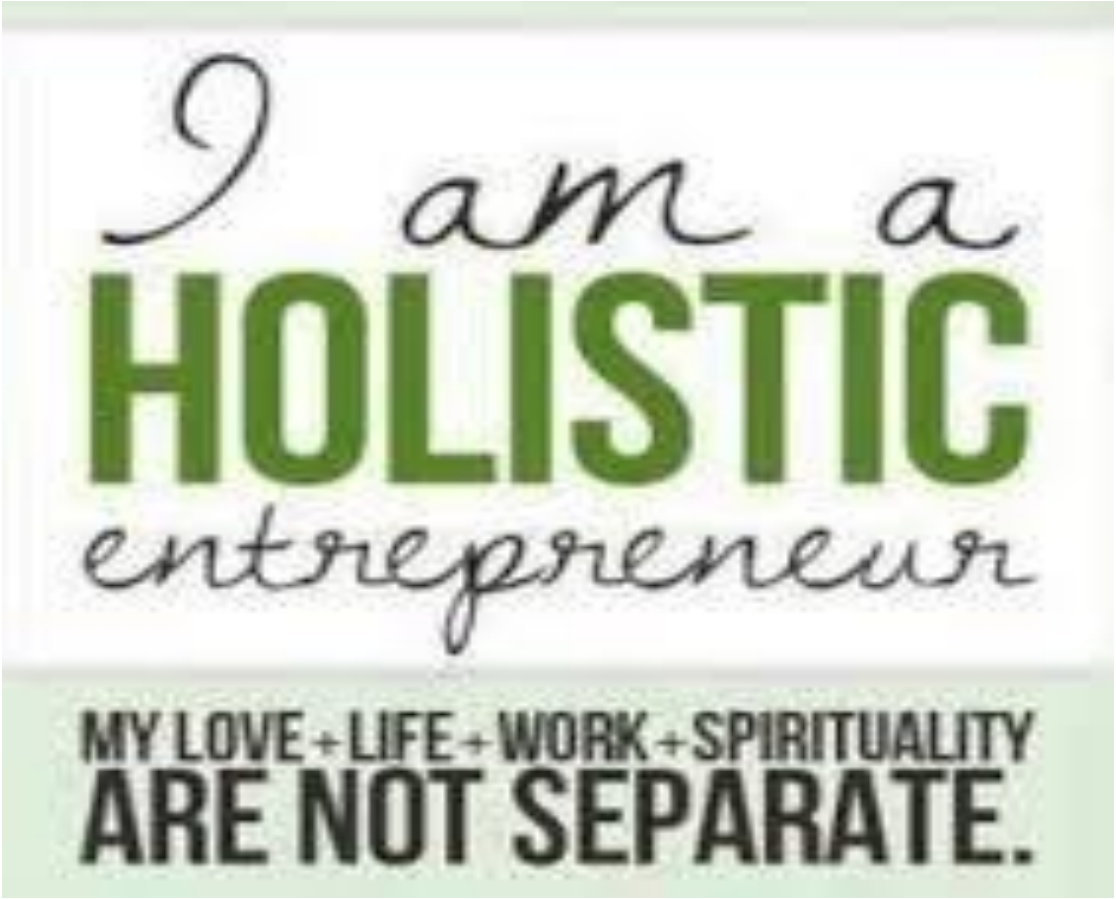

- If not all, a person needs to have at least 2 of the four states to be a person

What did Really Change?
Human Evolution: Drastic change of animal to human

YOUR
DREAM JOB
DOES NOT EXIST
YOU MUST
CREATE IT

Burada yeni fikirler ya da icatlar
konuşulmuyor.
Notlar konuşuluyor, meslekler,
Amerika'ya yerleşme.
Nasıl iyi not alınacağı öğretiliyor,
mühendislik değil.

I am a
HOLISTIC
entrepreneur
MY LOVE + LIFE + WORK + SPIRITUALITY
ARE NOT SEPARATE.

It is not what you do

it is all about

how you do it ☺

IT'S NOT WHAT
YOU DO, IT'S
HOW YOU DO IT.
IT'S NOT WHAT
YOU SEE, IT'S
HOW YOU LOOK
AT IT. IT'S
NOT HOW YOUR
LIFE IS, IT'S
HOW YOU LIVE IT.

Choose a job
you love

and you will
never have to work
a day in your life

Confucius

Finding yourself

- Understanding yourself and relating to others

Understanding human beings

- The evolutionary biologist's view
- The psychologists' view
- The management theorists' view

What motivates us

- Motivation at different life stages
- Motivation for individuals

Who we think we are

- Our roles
- Role conflict
- Feeling lost
- Personality and ego
- Internal identity

Who we really are

- The authentic self
- Self awareness
- Self understanding
- Self acceptance

- Relating to Others

How we see each other

- Prejudice
- Projection
- Persona

Relating to Others at Work

- Roles at work
- Management and leadership
- Promotion
- Developing a coaching management style

Developing your inter-personal skills

- Listening
- Non-verbal communication
- Pauses and silences
- Summarising and checking
- Questions
- Statements

"Know thyself" - Socrates

- Greek philosophers realised that knowing yourself was an essential pre-requiste for all wisdom.

- Socrates focussed upon knowing himself because there is little point in knowing about external things if you do not understand yourself first.

- In childhood …….knowing things and accumulating knowledge about the world…in order to pass exams and get good grades…**KNOWING AND UNDERSTANDING YOURSELF IS NOT A SUBJECT** that gets examined…..It is left to chance later in life, if indeed it is ever actively on the agenda.

- As adults we do not need to leave it to chance and can take responsibility for understanding ourselves at any point. We are able to take what we have learnt from others, reflect on our life experiences and discover for ourselves who and what we are.

- Not knowing yourself has broad implications for how you live your life and relate to others. A fuller version of the quote expands the point:

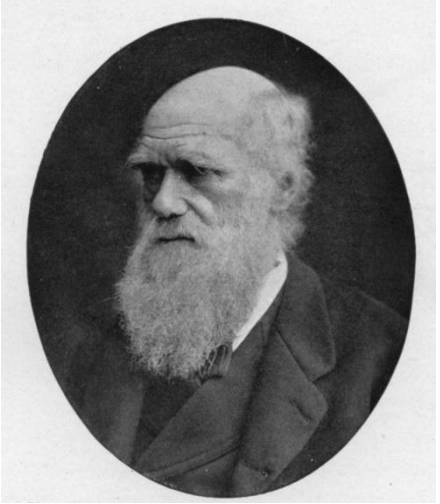

"My friend…..care for your psyche……know thyself, for once we know ourselves, we may learn how to care for ourselves"

- If you dont know and understand yourself you will not be able to take care of yourself; without being in touch with yourself, you will not be able to truly get in touch with others; without understanding yourself, you will not be in a position to understand and relate to others effectively.

- *Socrates says that the main priority of life is to find yourself – and, if you choose, you can become the world's expert on yourself. This is the path of personal growth and development and ultimately no-one can have a better understanding of yourself than you.*

Understanding human beings

➢The evolutionary biologist's view

Darwin

Driven by evolution….genetic code pass to next generation to reproduce

The weakest dye, strongest survive….

- So, evolution favors those that adapt to their environment the best and when the best interests of the individual animal coincides with the best interests of the group, the group survives as well.

- This could lead you to believe that ***competing***, ***fighting*** and ***putting yourself*** first is the natural way of things- yet this does not really explain how human society's work. There is clearly ***altruism*** operating in society where one person looks after another, rather than everyone always acting in their own narrow self-interest.

Dawkins

- Richard Dawkins has a much more interesting and illuminating insight about the ***selfish gene***. He was curious to explain why ***altruistic*** behaviour exists, not just in humans but in the wider animal kingdom. The conclusion was that *it is not the individual animal that wants to produce (although they clearly do), at a deeper level it is as if the gene wants to ensure its survival.* So, in a family or close community there is a willingness to be altruistic and support others at the expense of themselves to increase the chances of the shared genetic code surviving and getting passed on.

- There is a common misconseption that the «***selfish gene***» means that we are all programmed to be selfish – that is almost the exact opposite of what he is saying, the gene is selfish for itself and will sacrifice the human it inhabits for ensure its survival, it is not that it drives the individual human to be selfish.

- We are designed to be in a community, to live in tribes and ensure that it-and the genetic code within it-survives. ***Survival is not just for our own individual sake or for the sake of those around us because we want to survive comfortably, but altruism is literally in our DNA.*** Relating to others and supporting others is a natural – and evolutionary necessary- aspect of our human nature.

The Psychologists' wiev

Freud and Jung

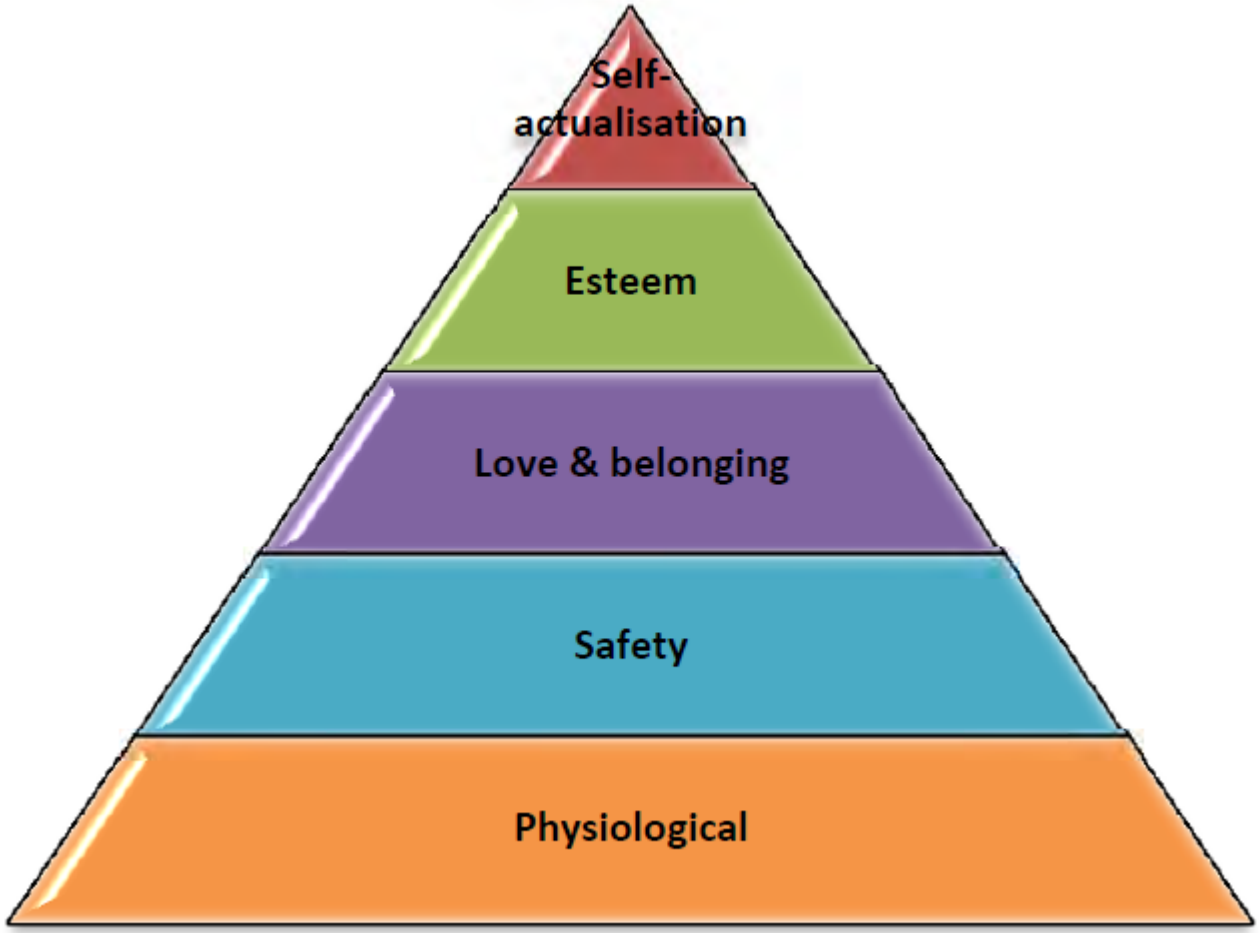

- ✓ Psychology has constantly tried to understand what motivates us. Sigmund Freud, introduced the concept of the ***unconscious mind, where many human motivations exist, hidden from conscious awareness-and bringing those into consciousness*** was one of the main objectives of psychoanalysis. Freud proposed the idea that the *main motivator in the unconscious was the libido.*

- ✓ His student, Carl Jung, developed different theories. For Jung the purpose of life was about «**individuation**» becoming fully ourselves, a movement towards the ideal of wholeness. As jung said- «***the privilege of a lifetime is to become who you truly are***»

It is this approach that which underlies a great deal of personal growth and development- there is potential in people which can be released and developed.

Maslow

In 1943 Abraham Maslow developed a theory of motivation based on looking at well developed people.

- ***Esteem*** from others comes the recognition received from external achievements. This can lead to desires for fame, status and prestige, perhaps found through a profession or hobby.

- ***Self-esteem*** or self-respect is derived from the satisfaction of achieving something, like a certain level of competence or knowledge in something. The respect arises internally rather than being dependent upon an external person.

- Maslow suggests that when all these needs have been met, then a fifth need arises, the need for ***self-actualisation***. This is idea of becoming oneself fully, to fulfil one's potential and become «*everthing that one is capable of becoming*».
  This is about what gives meaning and purpose to our lives.

- The concept of self-actualisation is consistent with the work of Jung-individuation and self-actualisation amount to much the same thing.

- The key points is that what ultimately drives us in life is personal development. This is an ongoing process and «finding yourself» is the result of this positive growth tendency.

- Maslow suggests that the **self-actualising person** is more integrated, happier and more contented, more able to take responsibility and better able to relate to others. Understanding yourself and relating to others go hand in hand.

McGregor

In the 1960s, Douglas McGregor proposed that staff could be motivated differently depending upon the attitude that they brought to work. He came up with two types of employee, **theory X** and **theory Y.**

Theory X employees generally dislike work and are motivated by external pressure from their managers and the money that they will take home at the end of the day. They are not motivated by the work itself, but by external factors (***extrinsic motivation***). Managers who assume that their employees are theory X will attempt to motivate their staff through target-setting, close supervision, reward (usually money) and blaming them when things go wrong.

Theory Y employees are motivated by the work itself and derive satisfaction from doing a good job (***intrinsic motivation***). Managers who have this understanding of their staff are likely to motivate by giving more challenging work, creating a climate of trust and giving recognition of a job well done.

Conclusion

- Deep within our DNA there is an **altruistic drive** to support the group which demonstrates how important relating to others is. What motivates us as individuals starts with the basic needs such as food and shelter. After that our main motivating factors are relating to others, **being ourselves** and **developing to fulfil our potential**.

- Finding and understanding yourself is not simply an interesting pastime for the few, it is an **intrinsic need** in all of us.
