Start-up Teams

Tools: Customer Development Manifesto

1. There Are No Facts Inside Your Building, So Get Outside
2. Pair Customer Development with Agile Development
3. Failure is an Integral Part of the Search for the Business Model
4. If You're Afraid to Fail You're Destined to Do So
5. Iterations and Pivots are Driven by Insight
6. Validate Your Hypotheses with Experiments
7. Success Begins with Buy-In from Investors and Co-Founders
8. No Business Plan Survives First Contact with Customers
9. Not All Startups Are Alike
10. Startup Metrics are Different from Existing Companies
11. Agree on Market Type – It Changes Everything
12. Fast, Fearless Decision-Making, Cycle Time, Speed and Tempo
13. If it's not About Passion, You're Dead the Day You Opened your Doors
14. Startup Titles and Functions Are Very Different from a Company's
15. Preserve Cash While Searching. After It's Found, Spend
16. Communicate and Share Learning
17. Startups Demand Comfort with Chaos and Uncertainty

~Steve Blank

"Working in teams is part of the human DNA. We have done it for thousands of years. It is the most natural way for people to organize themselves. It is in teams that we create progress. We believe that teams are the key to solving our world's largest challenges."

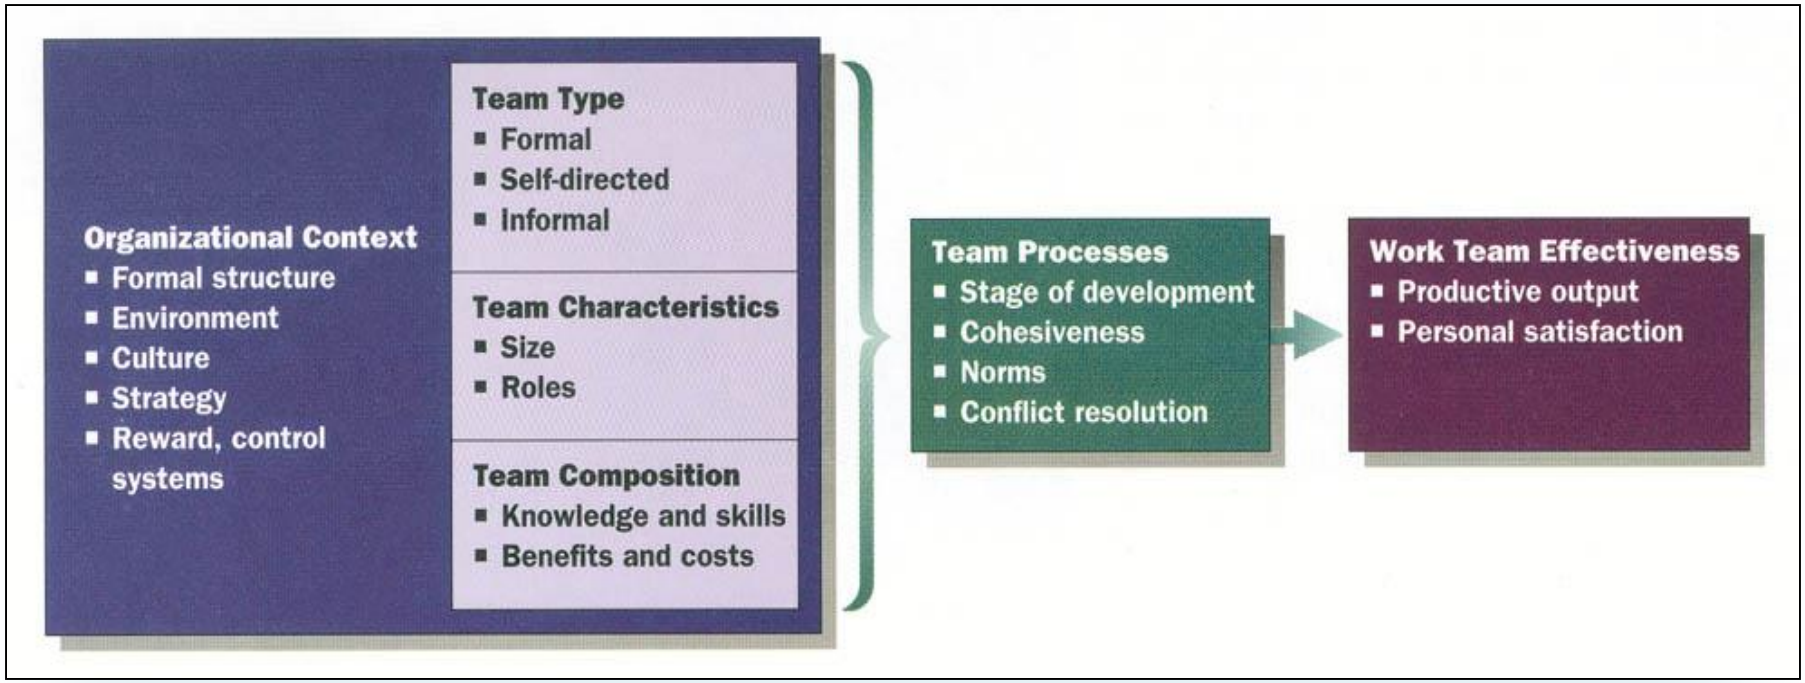

A Team Is?

Made up of 2 or more people
Have regular interaction
Team members share a performance goal

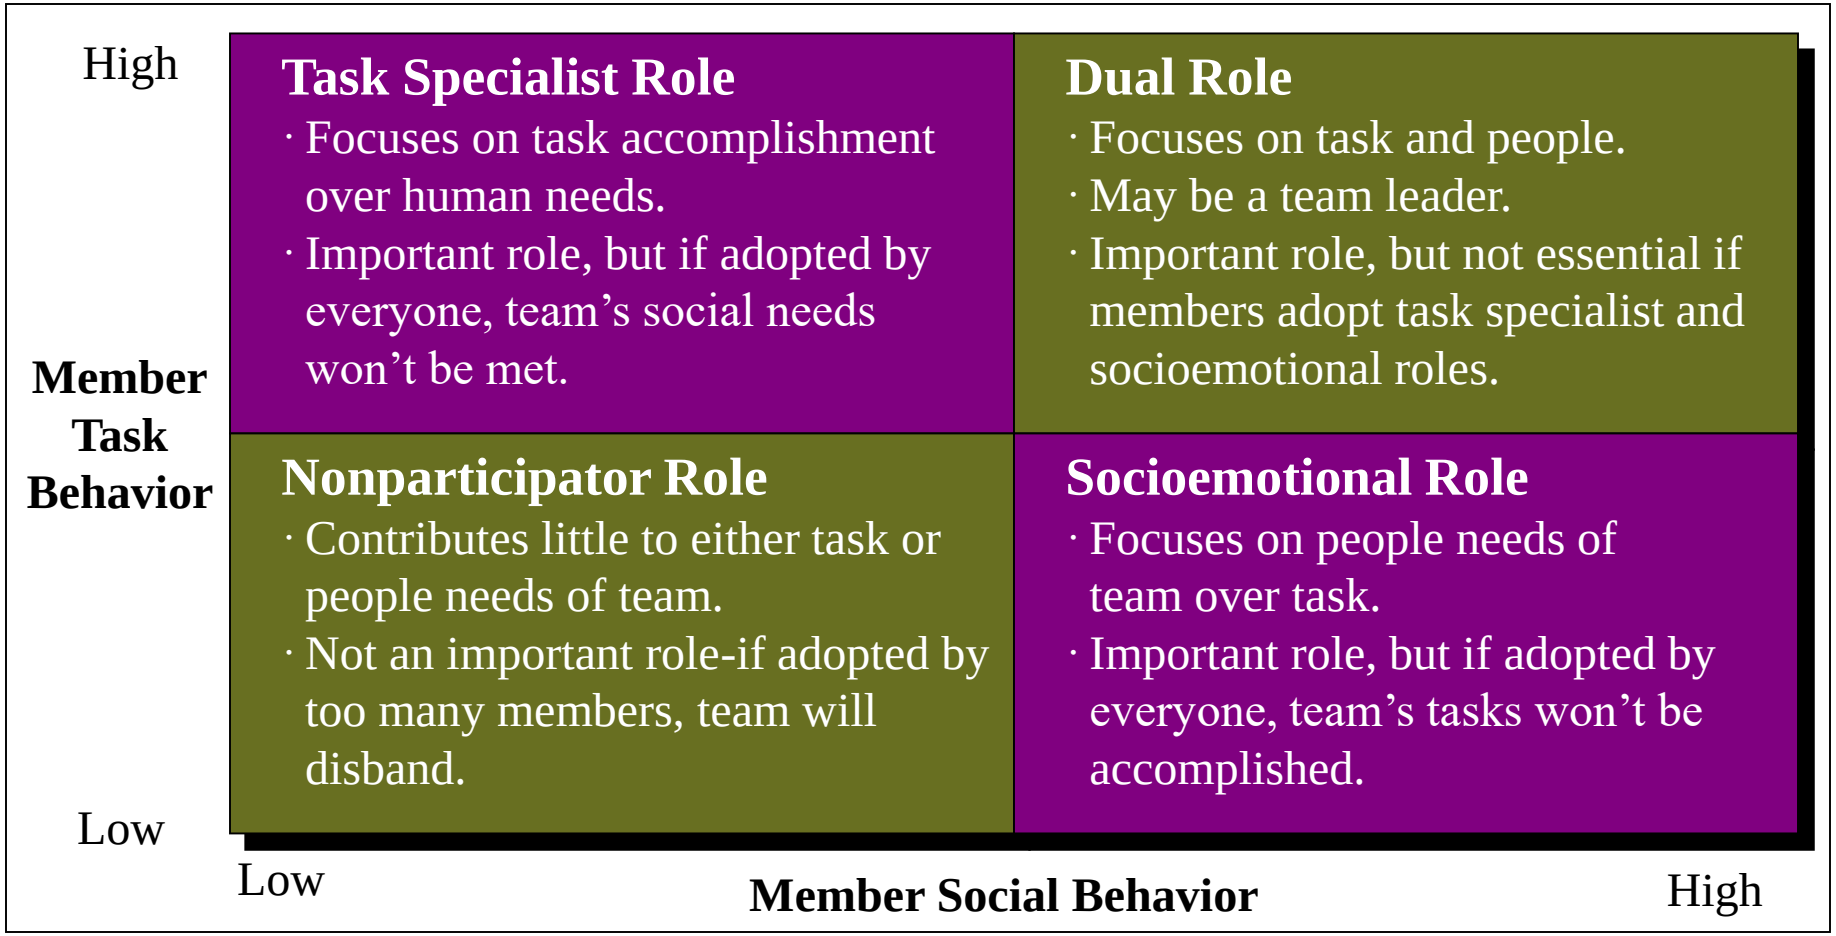

http://www.youtube.com/watch?v=w9j3-ghRjBs

Team Cohesiveness Determinants

- ☑ Team interaction, the more time spent together, the more cohesive the team
- ☑ Shared goals, members agree on goals, they will be more cohesive
- ☑ Personal attraction to the team, similar attitudes and values and enjoy being together

Causes of Team Conflict

- **Scarce Resources:** include money, information, and supplies.
- **Jurisdictional Ambiguities:** conflicts emerge when job boundaries and responsibilities are unclear.
- **Communication Breakdown:** poor communications result in misperceptions and misunderstandings of other people and teams.
- **Personality Clashes:** personality clashes are caused by basic differences in personality, values, and attitudes.
- **Power and Status Differences:** occur when one party has disputable influence over another.
- **Goal Differences:** conflict often occurs simply because people are pursuing conflicting goals.

Handling Conflict Models

Source: Adapted from Kenneth Thomas, "Conflict and Conflict Management," in Handbook of Industrial and Organizational Behavior, ed. M. D. Dunnette (New York: John Wiley, 1976), 900.

International Malaysian Training Center

Guidelines for Keeping Teams Focused on Issues

- ☒ Focus on facts
- ☒ Develop multiple alternatives
- ☒ Maintain a balance of power
- ☒ Never force a consensus

Potential Cost of Teams

When teams do not work well it is usually because:

- Power realignment
- Free riding
- Coordination costs
- System revisions

For start-ups the most important is..

- Idea..
- Expertise..
- Market…
- Product..
- Team…
- Money…

For start-ups…

The Team is 70% of why a venture capital deal does, or does not, happen.

~Bob Porthier, EPIC Ventures

Culture

Team is everything.
Team is everything.
Team is everything.
Team is everything.
Team is everything.
Team is everything.
Team is everything.
Team is everything.

Culture

A company's culture is an **extension** of the founders' **personalities**.

2. Nobody Knows the Trouble I've Seen ...

Finding the commitment to make it happen

Finding the right people to make it happen

3. Committing Yourself

Commitment requires the willpower to see things through (volition).

Volition is influenced by 5 factors:

---

1) Focusing your attention

5) Managing moods & emotions

2) Self-confidence / assertiveness

4) Goal-based self-discipline

3) Foresighted planning & problem solving

3. Finding Your Team

1) Engineering
2) Marketing
3) Sales
4) Business Development
5) PR
6) Design
7) Product Management
8) HR
9) Operations
10) Finance

3. Finding Your Team

1) Engineering
2) ~~Marketing~~
3) Sales
4) Business Development
5) PR
6) ~~Product Management~~
7) ~~Design~~
8) HR
9) ~~Operations~~
10) ~~Finance~~ → Outsourced crap

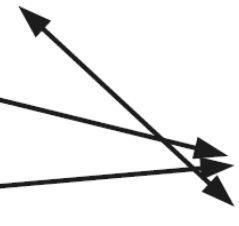

Team member 1

Job: Customer Experience

- Marketing
- Product Management
- Design

3. Finding Your Team

1) Engineering
2) ~~Marketing~~
3) Sales
4) Business Development
5) PR
6) ~~Product Management~~
7) ~~Design~~
8) HR
9) ~~Operations~~
10) ~~Finance~~ → Outsourced crap

Sales:

At an early stage, you are usually not certain what the final product will be. So you will not only be selling the current product to customers, but also to possible partners in exchange for distribution, financing or whatever.

Involves:

- Generating outside interest
- Finding potential partners

3. Finding Your Team

1) Engineering
2) ~~Marketing~~
3) ~~Sales~~
4) ~~Business Development~~
5) ~~PR~~
6) ~~Product Management~~
7) ~~Design~~
8) ~~HR~~
9) ~~Operations~~
10) ~~Finance~~ → Outsourced crap

Team member 2

Job: Attract outside interest

- Sales
- Business Development
- PR
- HR

3. Finding Your Team

1) ~~Engineering~~
2) ~~Marketing~~
3) ~~Sales~~
4) ~~Business Development~~
5) ~~PR~~
6) ~~Product Management~~
7) ~~Design~~
8) ~~HR~~
9) ~~Operations~~
10) ~~Finance~~ → Outsourced crap

Team member 3

Job: Build the product

- Coding

3. Finding Your Team

Hustler

Generate outside interest

Hipster

Deliver great customer experience

Hacker

Build the damn thing

Helpful personality traits:

- Go-Getter
- Die-hard
- Disciplined
- Extroverted
- Networker
- Creative
- Empathetic
- Thoughtful
- Good communicator
- Minimalist
- Analytical
- Structured
- Reliable
- Focused
- Stress-resistant

3. Finding Your Team

Ideally, team members will have different skill sets but similar values and goals.

And: Your goals should have a bigger purpose than inflating your ego and/or becoming rich.

3. Finding Your Team

1)
The money you earn, is the result of the value your business delivers.

2)
The value you deliver, is the result of how well you understand your customer.

3)
You will understand your customer better, the more you actually care about his problems.

4. Next Steps

1) Everybody with an idea or a startup gets the chance to pitch
2) Interested co-founders get the chance to chat up founders
3) Committing yourselves to the next step

Mingle

Interested co-founders get the chance to chat up founders

Questions you might want to ask:

- What are you passionate about?
- What drives you mad (about other people)?
- How would your friends describe you?
- What was the single most important moment in your life?
- What skills do you have?
- What skills are you looking for in a (co-)founder?
- Where do you see yourself 10 years from now?
- Why should I pick you?
- When did you last fail and what did you learn from it?
- What was you biggest success as a hustler/hipster/hacker?
- What personally trait of yours is currently limiting your success as a hustler/hipster/hacker?

Commit!

Commit

Committing yourselves to the next step

You need to find out 2 things about each other:

1) **Can you work together?**
2) **Can you have fun together?**
   → Go on 1 or more dates with your (co-)founder

   First date: Go for a drink!

   Second date: Have a jam session (work on a business modell, interview some customers, etc.)

How to start?

- Get to know each other as best as you can
- Define team rules
- Define team roles
- Define how team will deal with problems (eg. 5-WHYS with all team)
- Define next steps (eg. Lean Canvas)

The 5 Whys is an iterative question-asking technique used to explore the cause-and-effect relationships underlying a particular problem.

Example:

1. Why? - The battery is dead. (first why)
2. Why? - The alternator is not functioning. (second why)
3. Why? - The alternator belt has broken. (third why)
4. Why? - The alternator belt was well beyond its useful service life and not replaced. (fourth why)
5. Why? - The vehicle was not maintained according to the recommended service schedule. (fifth why, a root cause)

T.E.A.M. Framework

- Raimo van der Klein

Transformers: T-teams

- Willingness.
  - to participate, to imagine, to invest time and resources.
- Letting go of these old labels
  - when old “labels” started to fail and erode with people.
  - certain beliefs, business units, technologies, function titles, tools or jobs.
  - behind the willingness to transform is sadness and loss
- Developing new potential.
  - Other emotional themes in these teams include uncertainty about identity, loyalty, attention for the system(the “old” generation), values and purpose.
- Hosting this relabeling process of employees happens in “cocoons”.
  - Opening a process of relabeling and letting go of old labels is crucial to really effectuate the projects that T-teams work on.
  - NOT about building the vision
  - about relabeling the resources that identify themselves with this new future.

As an organization

You need to provide these type of safe spaces where it is safe to shed and be reborn.

These new transformed “future proof” resources will be the new foundation on which you will slowly and gradually build a “new house”.

These people will also be the most loyal to the organization as they were willing to transform themselves.

Explorers: E-teams

- Deep innovation and disruption.
  - deliver disruptive platforms and IP assets that can grow exponentially.
- Where with T- teams it is about relabeling, in E- teams it is all about the roles.
  - about structure and tactics.
  - about developing emerging opportunities.
  - about expansion and increase in strength.
  - about love for the problem and solution.

These teams want to control the future
(which is an illusion but don't tell them ☺).

E-teams are

- like teenagers that moved into the attic…
  - Independent and stubborn.
  - have not landed yet on earth and have not a lot of proof to show, it is a lot about representation and abstraction.
  - It is roleplaying, enacting.
- For example, team members represent certain viewpoints. Or in a lab context,
  - you have rebuilt a tiny universe in which you can act out.
- Where in T- teams we accept everybody's feelings and opinions, with E- teams you are aligning the team's point of view.
  - Not by compromise but an elimination of the weakest(survival of the strongest). Working towards a shared truth and consciousness.

Represenatation versus imagination

- Representation
  - goes much further than imagination(which is more for T-teams).
- Imagination
  - is media, it's an image in front of you.
- Representation is more embodied.
  - You experience it, you become part of it.
  - You live through it.
  - You need to have a little bubble(universe) in which you can really go deep down the rabbit hole to understand both the problem and the strength of the solution.

Artists: A-team

- A-teams are connected through the material they work with.
  - developing a campaign, or a website, maybe they love making music and we call them a band.
  - can also be a group of people working in the kitchen that love to work with beautiful ingredients.
  - In corporations, it might be development team that loves to make beautiful code.
- These teams produce.
  - They deliver a product.
  - They have eye for detail and really love the “art” they make.
  - They are not seeking the truth like E-teams or busy with testing or validating.
  - They are also not that involved with solving problems.
  - These teams produce things that attract.

It is beauty that they aspire. Eye for contrast and composition. Balancing “ingredients”.

- The output of this team is a noun.
  - A unique object.
  - the creative cycle is designed around the birth of a unique object with a unique name.
  - It is not about iterating and making the object perform better.
  - It is about “showing the world your baby”.
- These teams can often be disappointed if
  - others don’t recognize the beauty of their art
  - it is crucial that these teams really enjoy the process of making the “noun” itself.
- The satisfaction is
  - in the moment where you work together with the team.
  - Not by the recognition of the customer, press, board of directors, investor or other parties whom you show your beautiful artwork.
  - The members all know their skill and role. Ready to do their job and play the instrument they love. Be it a brush, a computer, a kitchen knife or a hammer.
- These teams are not busy with scalability.
  - have a hard time pricing their work.
  - More and more pricing will be based on rev-share models
  - So the more traction they are able to generate the more they will earn.

Mechanics: M-team

- Where E-teams can deliver potential disruptive assets, M- teams can
  - drive results by the application of solutions and by for example shuffling the actors in the business model canvas.
  - They are the masters of making things go frictionless.
- Once the A-teams have produced their work, it's up to an M- team
  - to turn that "noun" into "verbs" and even into "numbers".
  - are busy with changing the messaging, reframing solutions and building trojan horses just to make it all work together.
  - Supply meets demand and the "mess" it creates is solved by or M-teams.
- Here we move from being just right to also being successful.
  - The sacrifice that needs to be made is the purity of new solutions.
  - In a sense, the solution finally gets a role to play. The solution needs to adapt.
- Where in E- teams it is all about generating input with M-teams
  - it is all output. It helps a lot to be pragmatic, data-driven and a bit opportunistic in nature.
  - live to make the "machine" work smoothly.
  - Their product is the operation.
  - think in inputs and outputs.
  - can start to do value-based pricing.
  - know exactly what everything is worth.

Time and TEAM

- T-teams
  - feel free from everything and even free from time.
  - easily travel between the past and the future.
  - try to connect time and open up a generational narrative and in fact make things timeless as every time a new generation replaces the old.
  - death is not death. By transformation and self-healing we can cheat death.
  - Making everything timeless.
- E-teams
  - feel that they have been given a slot in time.
  - A temporary slot in time and space in which they need to make the most of it.
  - thrive in such a finite game. and want to control the outcome.
  - make tactics to control the future and see a journey in front of them.
- A-teams
  - are totally present. You need to become one with the moment in order for things to manifest. A
  - ll instruments need to be present in order to make the music.
  - An assembly line only works if all pieces work together and generate the final product.
  - Both brush, paint and painter need to be present in order to paint.
  - It is this feeling of being connected in the moment that is crucial for A-teams to succeed.
- M-teams
  - need to get feedback.
  - need to hear the echo return
  - are driven by the effect
  - experience the consequences of their actions
  - making them not fully present but slightly registering the effect of that what happened.

Space and TEAM

- T-teams
  - need a safe space; a space where they can show their vulnerability.
  - don't have a fixed space. They meet at set times and someone hosts.
  - also spend time in coworking spaces and coffee shops.
  - spaces that open up contemplation, daydreaming, and imagination.
- E-teams,
  - need dedicated spaces; to model, prototype and test.
  - need a "womb" in which they can grow and build strength.
- A-times
  - are becoming one with the space where they work; stocked with materials that are needed in process of production.
  - Be it that a MacBook is loaded with software programs to make great code or designs or be it that they have many instruments to make music with.
- M-teams
  - start the break up in space; everyone has their station.
  - Maybe they don't physically meet but they just make clear agreements on who does what and when. The show must go on.
  - The space for M-teams is open and available to customers.
  - Customers can enter the space and experience the team and their work.
  - May have a stand at a conference or they are a SaaS service and running the service is the main work now.

Leadership style and TEAM

- T-teams
  - especially benefit from one on one mentoring.
  - Team members of T-teams tend to be actively working on their personal development path.
  - T-teams often have no formal structure that allows other leadership roles to be part of the team.
- E-teams
  - need a supportive coach that focuses on the growth and health of the E-team.
  - E-teams are autonomous and outside of the team there is no leader.
  - E-teams go through turbulent phases where opposite viewpoints need to be bridged.
  - A coach can be essential to mediate the team through these phases and support the team to break through their ceiling of consciousness to a viewpoint that includes both viewpoints.
  - Within the E-team there is a leader that leads through his/her knowledge level but has no formal status.
- A- teams
  - need a producer that aligns all actions into one harmonious process of assembly. The producer creates the rhythm.
- Within M-teams
  - we start to think in above and below, in input and output. As the machine starts to manifest so will it's leader. They will mutually arise.

The main question and TEAM

There is always one big question the team is working on

- T-teams
  - are idealists and purpose driven. There needs to be clear why.
  - Once a T-team understands why they are willing to help.
- E-teams
  - are much more about how.
  - need to remove an “obstacle”.
  - Something is in the way of the desired state. They are riddle solvers.
- A-teams
  - are more involved in what influences the senses right now.
  - What they hear, see, feel and smell
  - The physical world enters the picture.
- M-teams
  - is continuously busy giving everybody a role, changing roles.
  - Who does what, when and where.
  - The overarching question is “who is acting?”
  - Everything becomes an actor in a sense.

The 4 P's and TEAM

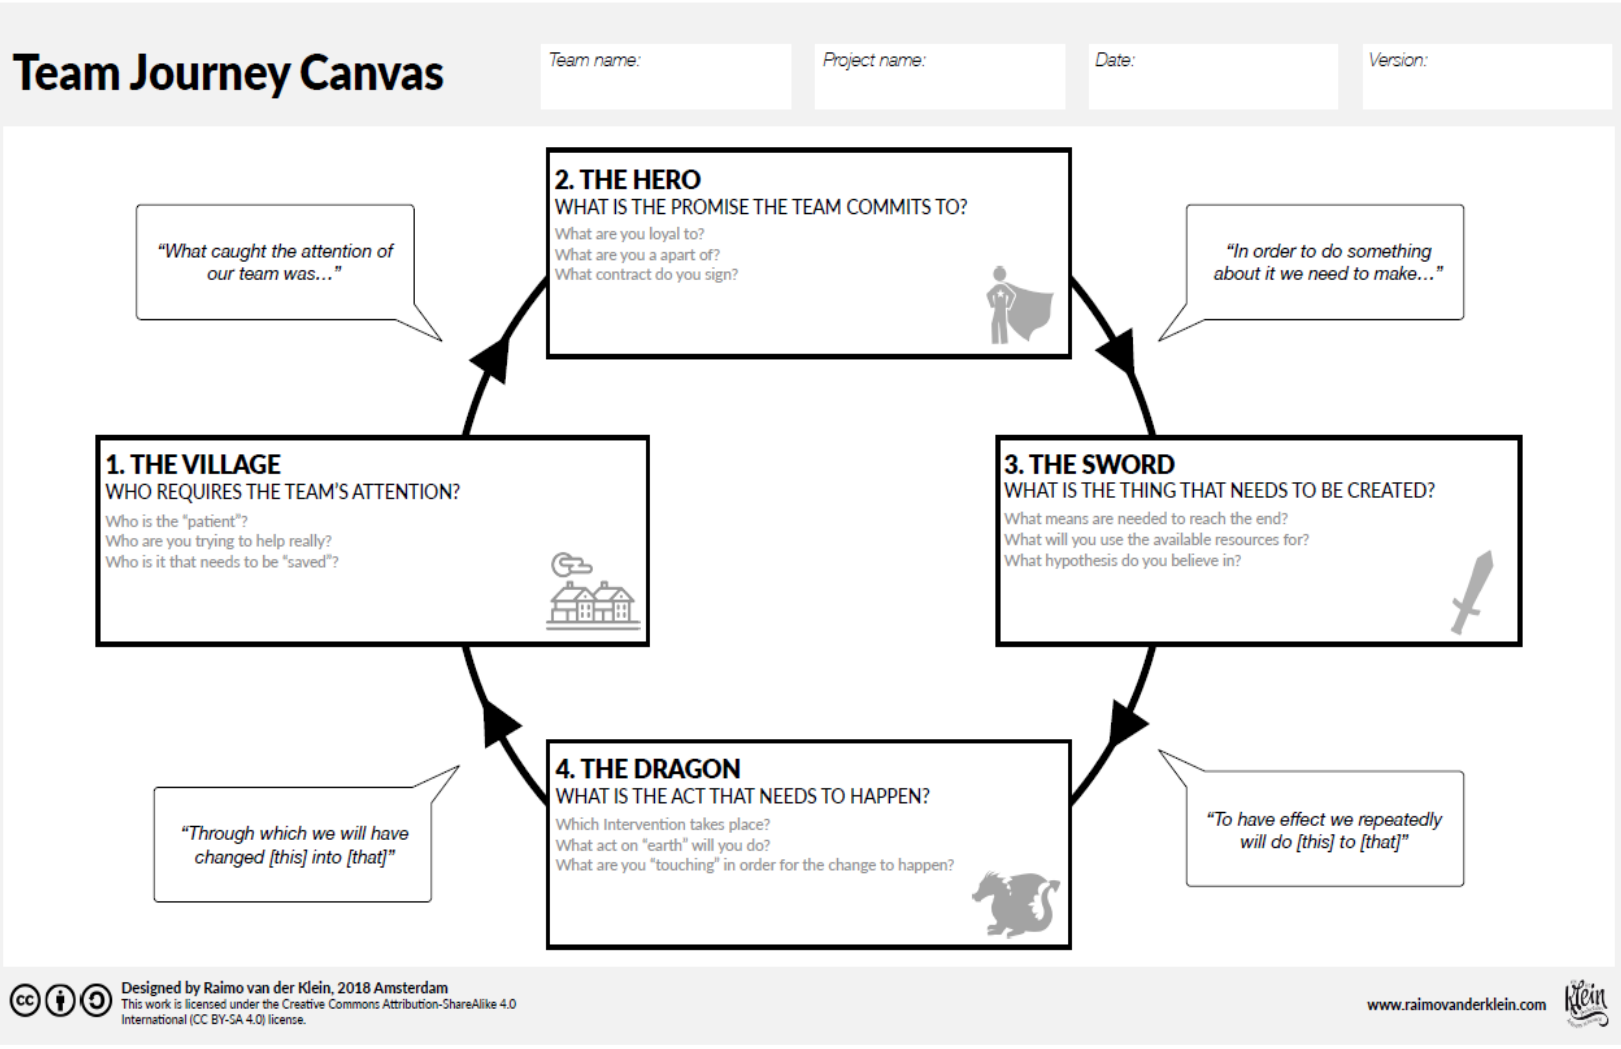

- T-teams
  - focus on the potential.
  - potentiality means that the team has an infinite amount of possibilities.
  - Meaning the future is still open.
  - Just like with Schrödinger's cat the T-teams have a superposition.
  - All the potential is within the team, untapped and barely defined. I
  - t is the job of T-teams to show the potential.
- E-teams
  - represent the solution and the promising next generation
  - build platforms that serve a set of use cases.
  - their product is most of the time bigger than a single use case.
- A-teams
  - produce. The product of these teams is available and can "consumed" by the public.
- M-teams
  - convert the promise into proof. W
  - here A-teams should be able to create product fit, M-teams create product/market fit.
  - It is the M-team that shows you the case, the working use case.

The Job and TEAM

Team Journey Canvas

- Design Thinking, Lean UX, Agile, Scrum and Lean Startup…
  - all great to describe the work methods and processes but
  - are really bad in giving meaning to some more basic human factors
  - Factors like motivation, values, creative skills, and culture.

Orphan Teams

- teams that identify themselves by the "product" they are making.
  - create products that are treated as hot potatoes once they have grown to a certain level of strength.
  - It is unclear to whom the product belongs and to whom it should be given.

Another thing

- It is unclear
  - for whom the team is working exactly.
  - often mix up the internal “customer” with the “external” customer, trying to please both.
  - is this project there to please a board of directors or is the team commited to help the customer that lives outside headquarters?

- Without having these elements clear,
  - teams tend to get stuck in a “cause and effect” loop instead of in an “means to an end” mentality.
  - The team explains themselves in a linear manner walking from the problem to the solution, ignoring the team’s mission and the uncomfortable exposed act they need to perform in order to be successful as a team.

Get clear team roles through a Team Journey

Once a team journey is clear

- it sets into motion a process of role definition and collaboration.

Many times when a team had unclear roles or it is unclear who needs to do what and when it is because of a still undefined team journey.

Get a clear team narrative for all stakeholders

- Once a team journey is defined
  - it becomes apparent to all stakeholders which unfamiliar terrain needs to be treaded by the team.
  - It also clear which familiar resources the team will use to reach that goal.

Having a clear Team Journey helps you to share your project in a compelling way with others even if they don't understand the intricacies of the domain you are operating in.

Canvas Explanation:

The Canvas has four main areas that needs to be filled in by the team:

The village, the hero, the sword and the dragon.

It is crucial in the development of the team that there is a mutual understanding of these four elements.

It is in fact the compass of the team.

1. The Village:

- The village is a piece of the Earth that you are connected to, or feel a part of.
  - if you are a salesperson, it might be that you consider you part of the worldwide village of salespersons.
  - İf you are a teacher and your village is the school you are working in, with all the students and teachers.
- By seeing the village,
  - you have positioned yourself in an observer position.
  - This observer position is the first crucial step in becoming a team.
  - You need to be able to observe the system you are defacto still a part of.

  Strange enough thinking and talking about the problem many times feels disloyal. In other cases it might reveal a vulnerability in the system, which is scary to admit. Therfore it might be accompanied with sadness or anger.

- *Good example statement: "**20.000 young adults** don't have a job in the Amsterdam region"*
- *"Bad example statement: We need more jobs"*

2. The Hero:

- The hero in the canvas is the team that chooses to commit to change the situation.
- The only way a team can truly become free to do this is by requesting permission to go on the mission.
  - This permission arises mutually with the promise to be loyal to certain values.
- This contract binds you to the system but allows you to become independent as the next generation of the system.
  - It is like an oath you sign. A pledge. You now work in service of something bigger than you.
- *Good example statement:"We promise to develop **healthy and organic food** products for youngsters"*
- *Bad example statement:"We are a time management app for millennials"*

3. The Sword:

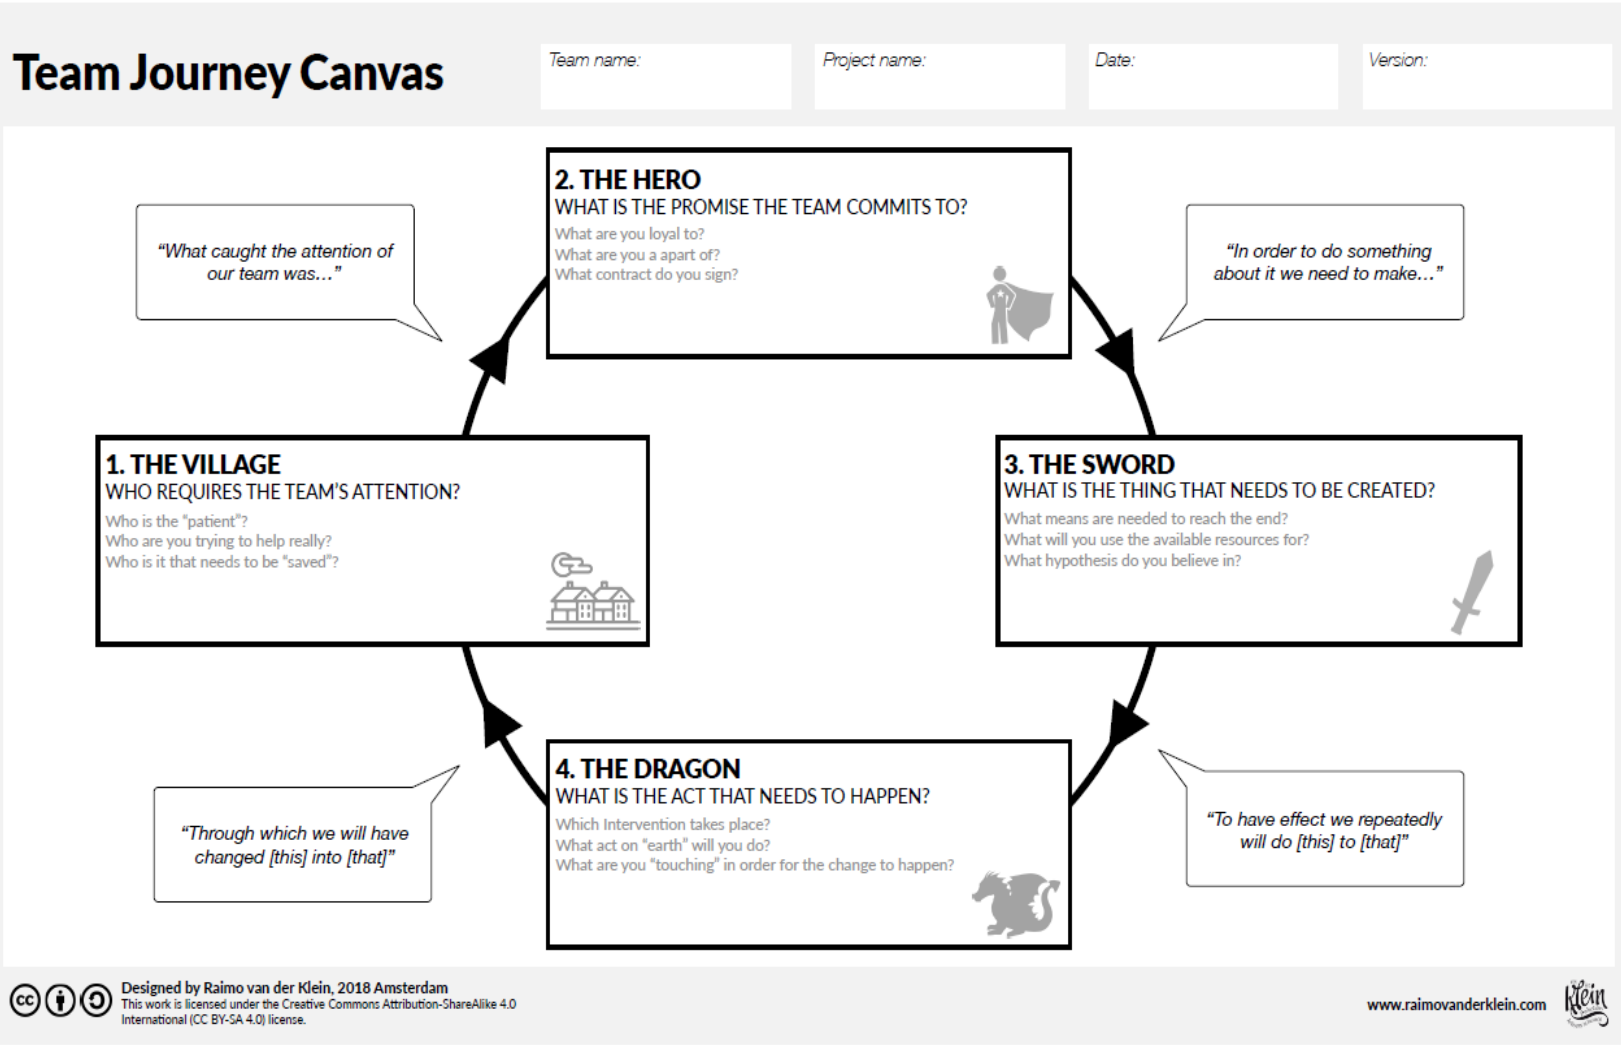

- The means that serves the end.
  - It is the hammer to drive the nail into the wood.
- Many times teams tend to break this one sword up into bulletpoints or multiple actions.
  - If that is the case you are focusing on the wrong abstraction level.
  - Zoom out to see the one thing you as a team are giving birth to.
  - There is one noun that is emerging as your team's way to reach the goal.
  - It might be a plan, a case, a product, a program, a service or a campaign.
- *Good example statement: "We are making **a crowdsource platform** for the fintech community"*
- *Bad example statement: "We are solving the climate problem with AI technology"*

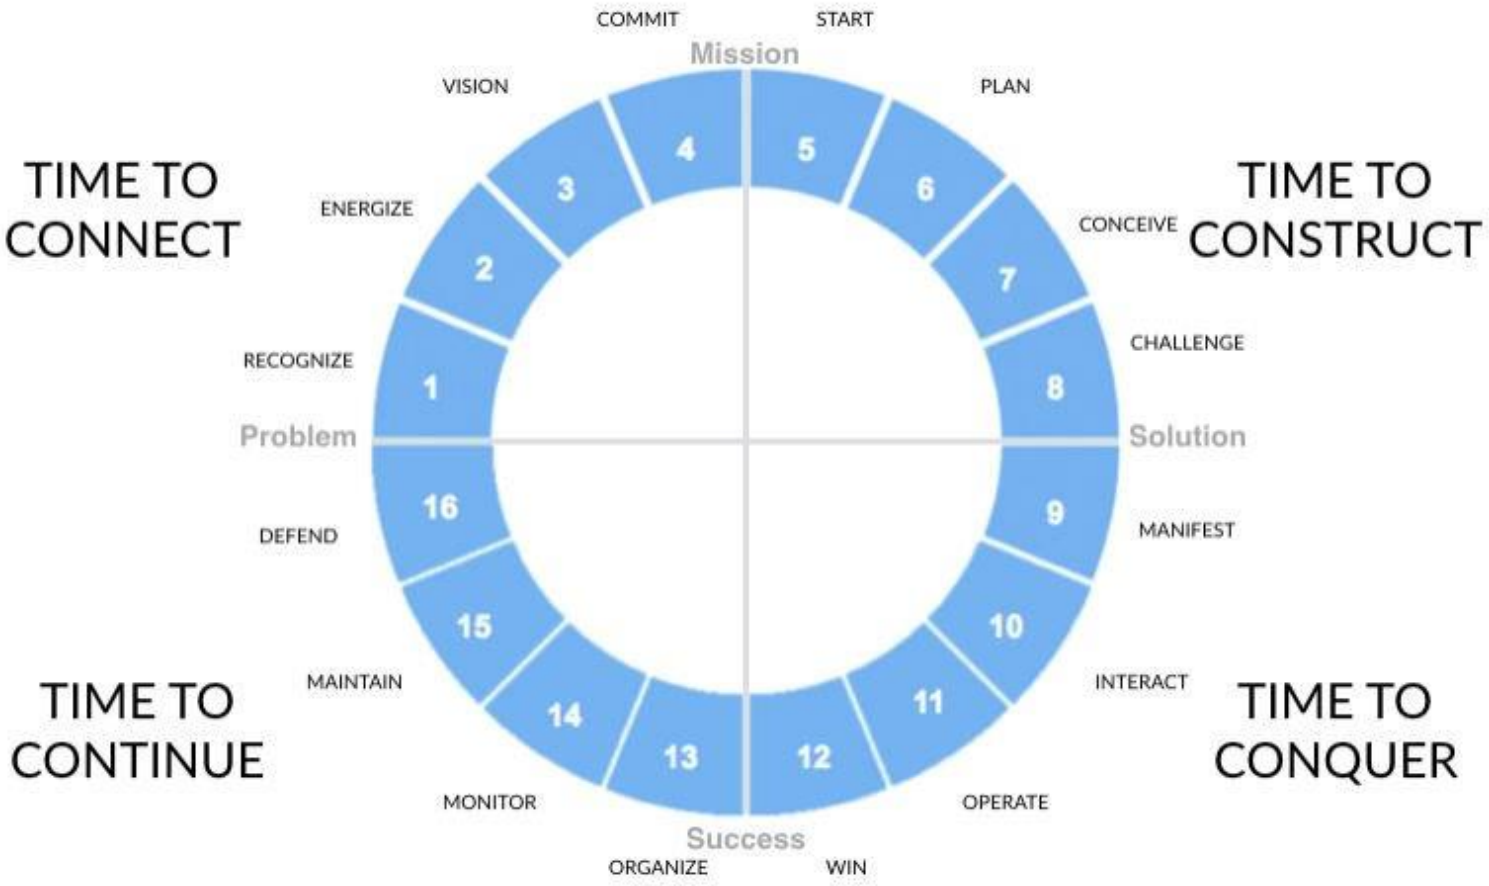

The Dragon

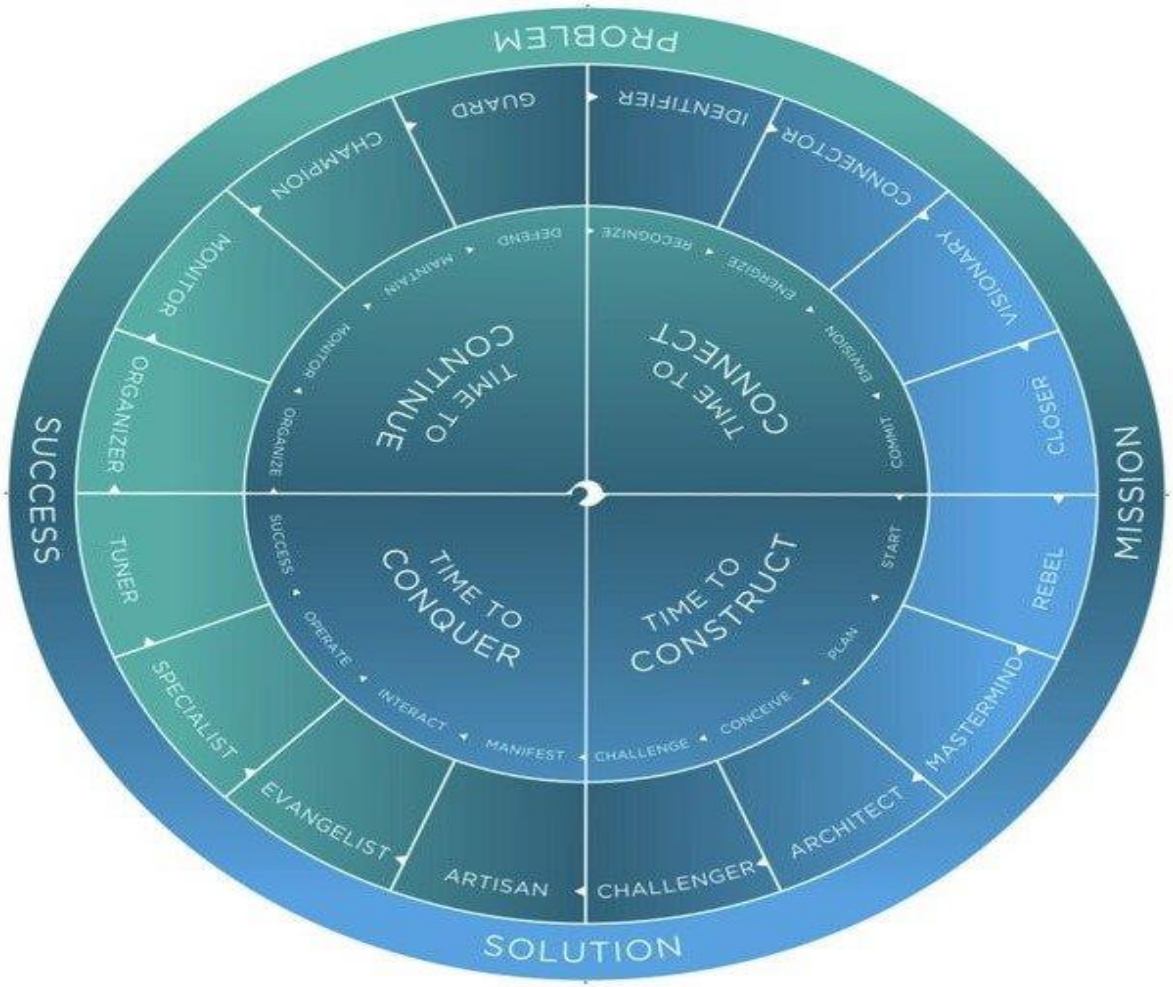

- It is the goal of the team.
- The dragon represents the obstacle that needs to be removed or replaced.
  - It really comes down to shifting molecules on earth.
  - It is literally effecting the real tangible world.
  - As it is tangible, it is measurable.
  - It is therefore easy to measure if you have succeeded in killing the dragon.
- The nature of this part of the project is that you cannot control the outcome.
  - There is no certainty.
  - Also it requires probably multiple “strikes” to kill the dragon.
  - Every transaction that takes place here kills the dragon and feeds the team.
  - Shifting the power balance.

- *Good example statement: "We will **selling 20.000 litre** of healthy coconut water to supermarkets in 2019"*
- *Bad example statement: "We will launch the app in the App store in December 2018"*

Safety & Cohesiveness

Is this team feeling like a team on a mission? Are we committed to this team and the cause?

Strength & Structure

Are we as a team capable of handling all the challenges we will face during a project?

Dependability & Collaboration

Can we rely on each other? Does everybody bring what's needed to succeed as a team?

Feedback & Reward

Are we learning as a team? Are we enjoying our successes together?

Design Ops Canvas BETA

Version:

What do we do?

What is the value we provide?
What does "good" look like?
What is our process and/or operating rhythm?
What methods and tools do we use?
What are our inputs and outputs?
How do we work together?

Who are we?

Teammates
Who are we looking for?
How do we recruit people?
How do we develop our people?
How do we retain people?

Stakeholders
Who are our most valuable partners?
What makes them successful?
What obstacles stand in their way?
How do we work with them?

Support
What support and resources do we need?

How do we communicate?

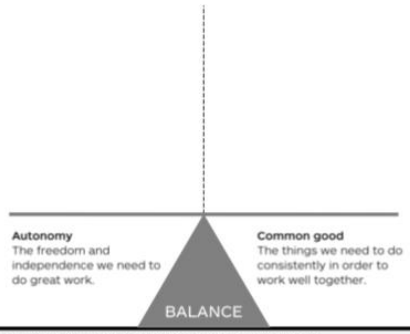

How do we communicate internally, within our teams?
How do we communicate externally, with other stakeholders?
How do we educate and evangelize?
How do we give and get feedback?
How do we share our knowledge and new learnings?

What constrains us?

What regulatory, security, or other realities constrain what is possible?
How do we manage conflicts and tradeoffs?
How do we manage risk?

How are we structured?

Balance
How do we balance autonomy and the common good?

Management
What is our mission?
How do we set goals?
How do we track and measure success?
How are we structured?
Who is responsible for what?

What else?

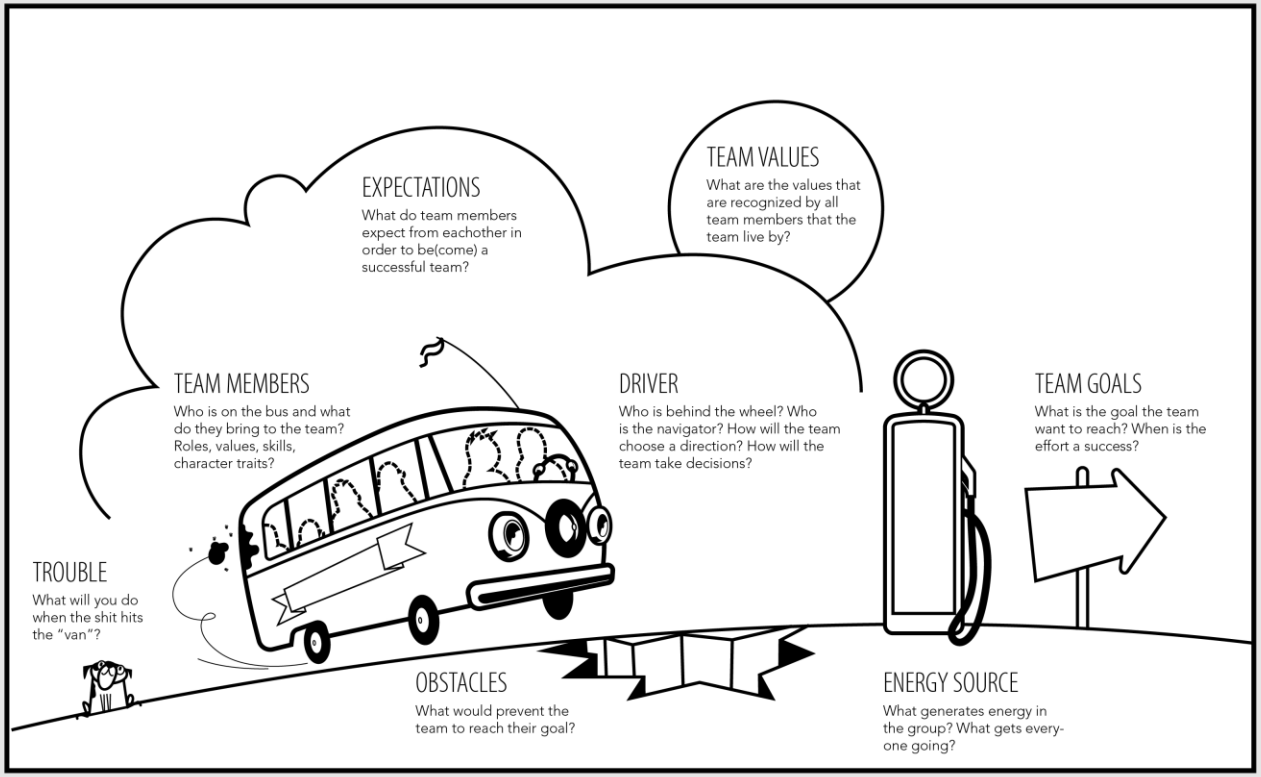

What else should we be thinking about?

Team Trust Canvas

Designed for:

Designed by:

Clarity

A Team experiences trust when they see transparency and mistrust when things are ambiguous. How shall we build and support the clarity, openness and transparency? How can we avoid the uncertainty and vagueness?

Connection

How can we avoid the uncertainty and vagueness? It is natural for people to follow others and build relationships. How can we connect and engage with each other? How can we improve our relationships and reduce conflicts?

Compassion

Team members need to care about each other. Are we ready to show concerns? Are we ready to be compassionate?

Values

People want to trust those who support their values. How can we align them?

Competency

We have confidence in those who stay fresh, innovative and competent. How do we grow our competency?

What else is important for us?

Commitment

We trust only those who demonstrate a commitment to action. How do we take responsibility and fulfill it?

Contribution

People are motivated and engaged when they deliver results. People trust results. Is anything getting done? How do our rules and policies promote getting things done? How do our organization's culture reward results?

Consistency

We like to see the things done consistently. Is our trust and confidence rising or falling each Sprint?

Team Canvas

Most important things to talk about in the team to make sure your work as a group is productive, happy and stress-free

Version 0.8 | theteamcanvas.com | hello@theteamcanvas.com

Team name _____ **Date** _____

PEOPLE & ROLES

What are our names and the roles we have in the team?

What are we called as a team?

COMMON GOALS

What you as a group really want to achieve? What is our key goal that is feasible, measurable and time-bounded?

VALUES

What do we stand for? What are guiding principles? What are our common values that we want to be at the core of our team?

RULES & ACTIVITIES

What are the rules we want to introduce after doing this session?
How do we communicate and keep everyone up to date?
How do we make decisions?
How do we execute and evaluate what we do?

PURPOSE

Why we are doing what we are doing in the first place?

PERSONAL GOALS

What are our individual personal goals? Are there personal agendas that we want to open up?

NEEDS & EXPECTATIONS

What each one of us needs to be successful? What are our personal needs towards the team to be at our best?

STRENGTHS & ASSETS

What are the skills we have in the team that will help us achieve our goals?
What are interpersonal/soft skills that we have?
What are we good at, individually and as a team?

WEAKNESSES & RISKS

What are the weaknesses we have, individually and as a team?
What our teammates should know about us?
What are some obstacles we see ahead us that we are likely to face?
